INAUGURAL ADDRESS

OF

PARSONS B. COGSWELL,

MAYOR OF CONCORD,

TO THE CITY COUNCIL,

JANUARY 24, 1893.

N 358.07 114 1393

THE MAYOR'S ADDRESS.

GENTLEMEN OF THE CITY COUNCIL:—In assuming the duties of the office to which I have been called by my fellow-citizens, I desire first to express my appreciation of the honor conferred. Our city is a goodly one, and has been made such by the well directed efforts of those who have preceded us in administering its affairs for more than a generation. Next April will complete forty years of municipal government in Concord. The change from town to city organization was strongly opposed by many, and it was only after three trials at the polls that a city charter was adopted, and after two trials that a mayor was elected. The affairs of the city were so wisely conducted from the outset that opposition to the change in form of government ceased speedily, and our city has progressed steadily from that day to the present. In four decades our population has doubled, our voters trebled, and our valuation quadrupled. The development of our city has brought increased duties to its city council and its chief ex ecutive officer. I am conscious of my lack of experience in municipal affairs; but, relying upon your cooperation, I will endeavor to discharge the duties imposed upon me to the best of my ability, and with an eye single to the interests of our entire city.

The incoming of a new city government before the reports of the preceding year are printed, renders it impossible to speak of the affairs of the city in so intelligent a manner as is desirable. I will call your attention to a few matters in a general way, and refer you to the several department reports in the city report, now in press, for a detailed statement of our municipal affairs.

FINANCIAL.

The report of the treasurer summarized gives the following as the financial standing of the city at the close of the last municipal year:

Balance January 1, 1892,	\$22,742.85
Total receipts,	367,234.20
Expenditures,	375,411.76
Cash on hand,	14,565.29
Precinct bonds paid,	2,000
City bonds paid,	13.000

The account with Concord Water-works shows the following receipts:

Balance on hand January 1, 1892,	\$9,315.45
Bonds,	358,00.000
Bonds premium,	16,519.25
Bonds interest,	3.539.90
Coupons due July 1, '92, bonds on hand,	1.500.00
Notes,	40,000.00
Income of Water-works,	48.283.33
Balance due treasurer,	24,075.15
	\$501,233.08

The expenditures were:

Interest on Water-works bonds,	\$26,560.00
Interest on Water-works note,	1,230.00
Maintenance and extension,	114,143.08
Notes,	80,000.00
Bonds,	199,300.00
Concord Mfg. Co., purchase of water-rights,	80,000.00
	\$501,233.08

The bonds due the present year are:

City,	\$12,250.00
Precinct (State House),	2,000.00
Union School District,	3,000.00
School District No. 20,	500.00
Penacook, sewer precinct sinking fund,	500.00

In making appropriations for the current year the sound business principle should be observed of providing amply, but not extravagantly, for the needs of the city. Our citizens cannot expect to have all the accessories of a modern, well ordered city without paying for them fairly and liberally. It is desirable that the rate of taxation should not fluctuate widely from year to year, and that in contracting municipal debts a near pay day should be kept in view.

CITY WATER-WORKS.

By the recent action of the city council a settlement has been effected with the Concord Manufacturing Company, by which the city has obtained complete control of the water-supply from Penacook lake. That action of the water commissioners and city council met with the general approval

of our citizens. The high service, which has been in process of construction for more than a year past, is completed, and it is confidently believed that it will bring satisfactory results. During last year \$200,000 of six per cent. bonds were refunded at four per cent., thereby saving \$3,000 in interest annually, and they also sold at a good premium. The total bonded indebtedness of the water-works is \$675,000, the interest on which is \$30,000 a year. The income of the works for the year 1892 was over \$48,000, and it is expected that it will be increased this year.

STREETS.

Our streets call for a large appropriation annually to keep them in repair. Increased interest is being awakened in the subject of improved roads in our state, and this necessarily includes the streets of cities. It is a matter of regret that many of our streets were originally laid out with little or no plan, and it is our duty to see that we do not contribute to this defect by any hasty or illy considered action in the laying out of new streets. Road and street making has not reached that stage of perfection in our city, state, and country that is desirable. We can at least try for improvement in our streets. The taxpayers have a right to expect the best results possible from the expenditure of the money provided by them for the care of streets. Owing to the fre-

quent digging up and faulty replacing of the paving on Main street, it is not in a creditable condition now. I trust that this matter, and the improvement of our streets generally, will receive due consideration by you.

In this connection I suggest that the subject of providing for a city engineer, who shall have charge of making durable plans for all our streets and sidewalks, and who shall do all the engineering required therefor, and also for all other departments of city service, be fully considered by you.

SEWERS.

The work of constructing sewers is one of the necessities of every growing city. Considerable has been accomplished in this line of work during the past year, but much remains to be done, which will demand your consideration. In the construction of new sewers, it is economy to keep in mind the prospective, as well as the present, needs of the city. The sewer at West Concord, although begun late, was pushed with commendable vigor, and all was accomplished that was designed last year. It is expected the present year will see the system completed.

PUBLIC SCHOOLS.

Our public schools are a just source of pride to all interested in education. The attendance of pupils increases yearly, and the instruction given keeps

pace with the most approved methods devised by experienced, practical teachers. The state has wisely provided for the free education of all children possessed of sound minds in sound bodies. Schoolhouses, teachers, text-books, and all other necessary appliances for the education of boys and girls to become intelligent and useful men and women, are provided at public expense. The law requires that a certain sum shall be raised for the support of the public schools, and authorizes the raising of an additional sum when necessity requires it, for the same purpose. It is a matter worthy of your consideration, whether some way cannot be devised by which the scattered schools in what is known as our "town system," and the schools in district No. 12, can be annexed to Union school district, which comprises nearly 80 per cent. of the whole number of children of school age in Concord. Uniformity of instruction and supervision is desirable in all our public schools, and the advantages of the High school should be enjoyed by every boy and girl in Concord who has a laudable ambition to profit by them.

PUBLIC LIBRARY.

The public library has continued its good work without interruption the past year. While the number of patrons has not increased over the previous year, there is good reason for believing that those

who have patronized it have derived a larger share of profit from it than ever before. The increasing use of the reference department by pupils in our public schools, bears testimony to its necessity and usefulness. It is a storehouse of tools for apt and ready minds to work with, in or out of school, with no expense to them but their time. The reading room has been well patronized daily and its stock of reading matter has been graduated by the means at the disposal of the trustees. As an educational aid the influence of our public library cannot be overestimated, and I feel sure that you will not allow it to suffer for want of a sufficient appropriation to carry on its beneficent work.

FIRE DEPARTMENT.

The report of the chief engineer of the fire department shows only twenty-one bell alarms, and ten fires in buildings within the precinct, the past year, with a total loss of less than \$1,000, largely covered by insurance. There were several alarms occasioned by brush and grass fires, and the steward of the central fire station responded to an unusually large number of still alarms with chemical pony extinguishers. Outside of the precinct there were fourteen alarms, all in Penacook, involving a total loss of \$6,801.01, upon which \$4,176.01 of insurance was paid.

The apparatus is reported to be in excellent condition, and nothing additional is called for in that line by the chief engineer. He does, however, recommend the purchase of another pair of horses for the street department, to take the place of a pair grown old in service, to be subject to call for the use of the Hook and Ladder company in case of fire. This is a matter deserving of early attention.

I would suggest that you take into consideration the advisability of connecting the villages of East and West Concord with the central fire alarm station, and also of supplanting the "Old Fort" hand engine with a chemical engine.

POLICE.

The good order and security of person and property which characterizes our city is strong testimony to the efficiency of the police department. No city of the size of Concord, so far as my observation has extended, can show a better record for good order and freedom from crime. The city marshal renews his suggestion, made in previous years, that the police department should be provided with a patrol wagon, to be always at its command in cases of emergency. Valuable time is frequently lost by officers in procuring conveyance to some part of the city where they are hastily summoned. It is a matter that might be considered in connection with the ambulance service perhaps.

PARKS AND COMMISSIONERS.

The recent action of the city council in accepting Rollins park will call for an additional appropriation, if this park is to be properly enclosed and plans for its laying out prepared. The donors of the park have a right to expect that we take some action looking to the care and development of it at an early day. It seems to me desirable that the powers of the park commissioners should be so enlarged as to include the care and ornamentation of all our public parks, and of all the vacant lands near the junction of streets; the removal of dead and decaying trees and the trimming of ornamental shade trees in our streets; and control of the cutting of growing shrubbery on the sides of our highways. Too much care cannot be bestowed in making the drives in our city attractive to our citizens, and to all strangers sojourning within our gates. This can be best performed by the park commissioners, if they properly perform their duties. Our city is visited in yearly increasing numbers by people from all parts of our country, and it is our duty to make it as attractive as possible to them.

CEMETERIES.

The care of our cemeteries appeals to the best sentiment of all our citizens. That the last restingplaces of the dead should be made attractive to the living is the desire of all. The degree of culture and taste of any community can be well gauged by an inspection of its cemeteries, by visitors. It is gratifying that the commissioners of cemeteries have bestowed so much attention and thought to their duties as they have, and that their plans of improvement of our cemeteries have progressed so far as they have. Much remains to be done, but with sufficient means at their disposal the work should be pushed vigorously. I would suggest that the selection of a more appropriate name for Blossom Hill cemetery might well engage your attention. There is apparently no significance to the present name, or at least none that satisfies the inquiries of strangers who visit that beautiful locality.

BUILDING IMPROVEMENTS.

There has been marked progress in building operations within our city the past year. This is especially noticeable in the dwellings which have been erected, both as to their exterior and interior designs. Attractive and comfortable homes do much to impress favorably all strangers who visit our city. Our business blocks and structures have elicited frequent commendation in the past, and the new ones in process of construction will deserve like praise. With the improvement of the water power of the Contocook and Merrimack rivers, there is likely to be increased growth of population in some of our wards, and, it is to be hoped, of new manufacturing industries.

The facilities for transportation afforded by the Concord Street Railway are being utilized more and more every year, and its importance as a factor in promoting, not only our comfort, but the growth of our city, is better appreciated to-day than ever before.

AIDING THE NEEDY.

Our several charitable societies do much every year to relieve the wants of the needy poor. It is voluntary aid which often reaches people who would shrink from calling for public aid. No worthy person need suffer for absolute necessaries of life in our city if they but make their necessities known to the overseers of the poor or to the efficient almoners of our charitable societies. If the idle and dissolute sometimes suffer, it is a result of non-compliance with the very old injunction, "In the sweat of thy face shalt thou eat bread." There is, and there can be, no excuse for street begging in our city, where employment can generally be found by every person seeking it.

MARGARET PILLSBURY HOSPITAL.

The Margaret Pillsbury General Hospital has admirably met the wants of many sufferers the past year, and no appropriation can be less spared than that to this institution. The capacity of the hospital, provided by the generosity of our former townsman, Hon. George A. Pillsbury, was tested at one time by

twenty-seven patients. The management of the institution has been satisfactory to the patients and the patrons who have generously aided in sustaining it by material aid.

BOARD OF HEALTH.

The sanitary condition of our city is reported good, and there has been no marked increase of mortality the past year. January showed an unusually large death rate, which was counterbalanced by an unusually small one in June. An abundant supply of water, good sewers, and safe plumbing are important factors in maintaining satisfactorily the health of any community. The precautionary steps that are being taken by our national anthorities to prevent the introduction of cholera into the country the present year, should be supplemented, if necessary, by timely action on the part of all city authorities to enforce the required sanitary regulations to that end. Hitherto, when that much dreaded disease has found lodgment in the United States, Concord has been exempt from it. By maintaining proper sanitary conditions, I doubt not that it will continue to be free from that pestilence, should it in the future gain a foothold within our country.

TEMPERANCE.

There can be no difference of opinion among intelligent and thoughtful people, as to the evils of

intemperance, and the blessings of temperance, in any and every community. It is concerning the methods of controlling and regulating the sale of intoxicating liquors that differences of opinion occur. For more than a generation prohibition of the sale of intoxicating liquors as a beverage, or the keeping of them for sale for that purpose, has been the law of our state. All efforts to repeal that law, or to essentially modify it, have failed, and United States courts have sustained the right of a state to prohibit the sale of such liquors. Intoxication, and the sale of intoxicating liquors, except under certain clearly defined specifications, are both offences under the law, and punishable as such. The latter offence involves the first to a deplorable extent, and the law imposes upon it a heavier punishment. It is fair to presume, perhaps, that no one sells intoxicating liquors from love of stealing away men's brains, or of robbing them of their earnings and good name, but rather from what was characterized many centuries ago as "the root of all evil." To minimize the profits on liquor selling to a vanishing point may contribute something to curtail, if not end, an outlawed traffic.

ECONOMY AND REFORM.

These are trite words, too often glibly spoken. In a certain sense, however, they are always applicable to the proper conducting of municipal affairs. Taxpayers rightfully expect an economical and wise expenditure of the money which they pay for public use. The integrity and intelligence which make private business successful are needed to wisely conduct public affairs. I suggest that it would aid us much if at an early day a special committee should be empowered to examine carefully and thoroughly the business methods of every department of our city service, and report thereon, with such recommendations as they deem advisable.

In this connection it would be well to consider the feasibility of concentrating the offices of the several departments of city service more than they now are. Convenience of the public and economy in expenditures are two important considerations to be kept in mind in locating such offices.

CONCLUSION.

In discharging the public duties which have been imposed upon us by our fellow-citizens, let us, one and all, ever keep in mind the welfare of this beautiful capital city of one of the grandest states of the best nation the sun has ever shone upon. In seeking this object, we can do no better than to individually heed the injunction which the immortal Bard of Avon made Wolsey utter nearly three centuries ago,—"Be just, and fear not. Let all the ends thou aim'st at be thy country's, thy God's, and truth's."

THE FORTY-FIRST

ANNUAL REPORT

OF THE

RECEIPTS AND EXPENDITURES

OF THE

CITY OF CONCORD

FOR THE YEAR ENDING

DECEMBER 31, 1893.

TOGETHER WITH OTHER ANNUAL REPORTS AND PAPERS RELATING TO THE AFFAIRS OF THE CITY.

Concord, J. D.

Printed by the Republican Press Association.
1893.

MUNICIPAL REGULATIONS

FOR PAYMENT OF BILLS AGAINST THE CITY.

All persons furnishing materials or service for the city, or aid to the city poor, should be particular to take the name of the person ordering such service, material, or aid, and should *know* that the person is duly authorized to contract said liability.

The city will not be holden for merchandise sold or delivered on city panper account, except on the written order of the Overseer of the Poor, and for no longer time than until his successor shall have been appointed and qualified.

Duplicate copies will be required of all bills payable by the city, furnished on county pauper account.

All bills against the city must be approved by the person authorizing the charge; and unless this is done, no action can be had upon the bill by the Committee on Accounts, and no order will be given for its payment.

When bills are certified to as above, and left with the city clerk before 12 o'clock of the day of meeting of the Committee on Accounts, they will be audited by them, and, if approved, be ready for payment on the Thursday following.

Meetings of the Committee are held on the Thursday next preceding the second Tuesday in each month, at 2 o'clock p. m.

JOSEPH A. COCHRAN, City Clerk.

CITY GOVERNMENT,

CONCORD. N. H.

Inaugurated fourth Tuesday in January, biennially.

1893.

EXECUTIVE DEPARTMENT.

MAYOR.

Elected by inhabitants biennially in November. Salary, \$1,000 per annum.

PARSONS B. COGSWELL.

Office: No. 7 Bailey's Block, North Main St.

ALDERMEN.

Elected by inhabitants of each ward biennially in November. No salary as such, but allowed \$60 each for committee service.

Ward 1—HENRY E. CHAMBERLIN.

ALFRED E. EMERY.

Ward 2—FRANK P. CURTIS.

Ward 3-ADAM P. HOLDEN.

Ward 4—EDWARD P. COMINS.

AUSTIN S. RANNEY.

WILLIAM H. PERRY.

TIMOTHY P. SULLIVAN.

Ward 5—HENRY W. STEVENS.

CHARLES R. WALKER.

 $Ward\ G$ —CHARLES C. NUTTER.

JAMES II. SANDERS. JOHN II. SPELLMAN.

Ward 7—WILLIAM A. COBB.

JOHN H. MERCER.

CITY CLERK.

Elected biennially in January by City Council. Salary, \$800 per annum.

JOSEPH A. COCHRAN.

Office: City Hall Building

COMMON COUNCIL.

Elected by inhabitants of each wird biennially in November. No salary as such, but allowed \$30 each for committee service.

President—HOWARD A. DODGE.

Ward 1—EDDIE C. DURGIN.
ROBERT W. HOIT

Ward 2—SAMUEL L. BACHELDER.

Ward 3-LOUIS A. ENGEL.

Ward 4—JOHN A. BLACKWOOD.

FRANK S. MOULTON.

LEWIS B. PHTNEY.

HENRY W. HAYDEN.

Ward 5—HENRY O. ADAMS.

HOWARD A. DODGE.

Ward 6-ARTHUR E. DOLE.

GEORGE S. FORREST.

WILLIAM A. LEE.

Ward 7—WILLIAM W. CRITCHETT. FRANK L. SAWYER.

CLERK OF COMMON COUNCIL.

Elected by Common Council biennially in January. Salary, \$50 per annum.

EDWARD M. NASON.

Office: 38 Perley St.

JOINT STANDING COMMITTEES OF THE CITY COUNCIL.

Aldermen appointed by Mayor, and Councilmen appointed by President of Common Council, biennially in January.

On Finance—The Mayor; Aldermen Holden and Ranney; Councilmen Adams and Lee.

On Accounts and Claims—Aldermen Stevens and Nutter; Councilmen Dole and Blackwood.

- On Lands and Buildings—Aldermen Sanders and Mercer; Councilmen Hoit and Putney.
- On Public Instruction—Aldermen Chamberlin and Comins; Councilmen Moulton and Sawyer.
- On Parks and Commons—Aldermen Walker and Cobb; Couneilmen Critchett and Blackwood.
- On Roads and Bridges—Aldermen Emery and Ranney; Councilmen Forest and Engel.
- On Fire Department—Aldermen Sullivan and Walker; Councilmen Havden and Forrest.
- On Lighting Streets—Aldermen Comins and Spellman; Councilmen Adams and Hayden.
- On Cemeteries—Aldermen Cobb and Perry; Councilmen Durgin and Bachelder.

STANDING COMMITTEES IN BOARD OF MAYOR AND ALDERMEN.

Appointed by Mayor biennially in January.

- On Elections and Returns—Alderman Nutter.
- On Engrossed Ordinances—Alderman Curtis.

Appointed annually in January by Board of Mayor and Aldermen. Salary, \$200 per annum.

CHARLES A. DAVIS.

* Deceased.

ASSISTANT ENGINEERS.

Appointed annually in January by Board of Mayor and Aldermen.

FOR PRECINCY.

Salary, \$100 each per annum.

WILLIAM C. GREEN. JOHN J. MCNULTY. WILLIAM E. DOW.

FOR PENACOOK.

Salary, §15 per annum.

WILLIAM W. ALLEN.

FOR EAST CONCORD.

Salary, \$10 per annum.

JOHN E. FRYE.

FOR WEST CONCORD.

Salary, \$10 per annum.

GEORGE W. KEMP.

STEWARD CENTRAL FIRE STATION.

Appointed annually in January by Board of Mayor and Aldermen. Salary, \$600 per annum.

NAPOLEON B. BURLEIGH.

ASSISTANT STEWARD CENTRAL FIRE STATION.

Appointed annually in January by Board of Mayor and Aldermen. Salary, \$600 per annum.

JOHN H. TRUE.

STEWARD FIRE STATION, PENACOOK.

Appointed annually in January by Board of Mayor and Aldermen.

ENOCH E. ROLFE.

STEWARD FIRE STATION, EAST CONCORD.

JOSEPH E. PLUMER.

STEWARD FIRE STATION, WEST CONCORD.

PATRICK CONWAY.

SUPERINTENDENT OF FIRE ALARM.

Appointed annually in January by the Board of Mayor and Aldermen. Salary, \$200 per annum.

NAPOLEON B. BURLEIGH.

SUPERINTENDENT OF CITY CLOCKS.

Appointed annually in January by Board of Mayor and Aldermen. Salary, \$85 per annum.

NAPOLEON B. BURLEIGH.

INSPECTOR OF ELECTRIC WIRES.

Elected annually on or before April 1st. Salary, 40 cents per hour for actual service rendered, paid by the person or company owning the wires.

FRED W. LANDON.

POLICE DEPARTMENT.

POLICE JUSTICE.

Appointed by Governor and Council. Salary, \$800 per annum, fixed by City Council.

BENJAMIN E. BADGER.

Office: Police Station.

SPECIAL POLICE JUSTICE.

Appointed by Governor and Council. Salary, §2 per day of actual service.

AMÓS J. SHURTLEFF.

CITY SOLICITOR.

Elected biennially in January by City Council. Salary, \$500 per annum.

HARRY G. SARGENT.

Office: 60 North Main St.

CLERK OF POLICE COURT.

Appointed by Police Justice Salary, \$200 per annum, fixed by Legislature.

GEORGE M. FLETCHER.

CITY MARSHAL.

Formerly appointed biennially in January by Board of Mayor and Aldermen, but now by the Police Commissioners. Bond of \$300 required. Salary, \$1,200 per annum.

GEORGE S. LOCKE.

Office: Police Station.

REGULAR POLICE AND NIGHT WATCH.

Appointed by Police Commissioners. Salary, \$800 each per annum.

James E. Rand, Captain of Night Watch.

Daniel S. Flanders, Charles H. Sanders,* Charles E. Kelley, John E. Baker, Fred M. Eaton. Levi F. Cole, Horace Robinson, Whitney D. Barrett, Charles P. Webster, James Kelley.

SPECIAL RESERVE OFFICERS.

Net liability on account of school-districts, \$116,280.00

These bonds are issued under ordinances of the city council, as authorized to do by the act of the legislature of New Hampshire, approved August 14, 1889, entitled "An act authorizing the city of Concord to borrow money in aid of its school-districts." These school-districts have, by their votes and by their agents duly authorized, bound themselves to the city to seasonably pay to the city sufficient sums of money to enable it to meet the payments of interest and principal upon their indebtedness, and all incidental expenses, as the same shall become due.

The above bonds were issued under ordinances passed by the city council, establishing a sewer precinct in Penacook, and anthorizing loans on the credit of the city for the establishing of said system. The ordinances also provide that the yearly interest and a portion of the principal shall be raised each year, for the purpose of creating a sinking fund to pay said bonds as they mature, as follows:

\$500 annually for ten years from August 1, 1888, \$1,000 annually for five years from August 1, 1898, \$1,200 annually for five years from August 1, 1903, \$1,000 annually for five years from May 1, 1908, \$500 annually for six years from July 1, 1914, by taxation upon the taxable property in Penacook Sewer Precinct, said sums, as soon as received, to be placed at interest by the finance committee.

WEST CONCORD SEWER PRECINCT.

Sewer Bonds, payable as follows:

When due. October 1, 1902, October 1, 1907, October 1, 1912,	Rate of interest. 4, 4. 4.	Interest pay semi-annu semi-annu semi-annu	ally, ally,	Amount. \$5,000.00 5,000.00 7,000.00
Interest accrued	\$17,000.00 170.00			
Amount of sinking	g fund accumu	ılated, .		\$17,170.00 . 500.00
Net indebtedness of sewer precinct,		West Conce	ord •	. \$16,670.00

The above bonds were issued under ordinances passed by the city council, establishing a sewer precinct in West Concord, and authorizing loans on the credit of the city for the establishing of said system. The ordinances also provide that the yearly interest and a portion of the principal shall be raised each year, for the purpose of creating a sinking fund to pay said bonds as they mature, as follows:

\$500 annually for ten years from October 1, 1892,

\$1,000 annually for five years from October 1, 1902,

\$1,400 annually for five years from October 1, 1907,

by taxation upon the taxable property in West Concord Sewer Precinct, said sums, as soon as received, to be placed at interest by the finance committee.

REPORT OF COMMITTEE ON FINANCE.

The books of the city treasurer have been examined, and compared with those of the city clerk, by the committee on finance, and all the accounts are found to be correctly kept, with proper vouchers on file for all payments. All the bills allowed by the committee on accounts and claims have been paid, and no claims against the city which the city would be liable to pay are known to remain outstanding, with the exception of those mentioned under the heading of unfunded debts; and the balance in the hands of the treasurer is fifty-one thousand one hundred sixteen dollars and thirty-one cents (\$51,116.31).

PARSONS B. COGSWELL, ADAM P. HOLDEN, AUSTIN S. RANNEY, HENRY O. ADAMS, WILLIAM A. LEE,

Committee on Finance.

1

CITY EXPENSES.

FROM JANUARY 1 TO DECEMBER 31, 1893.

Being an itemized account, made up from the books of the City Clerk, of the payments made by the City Treasurer on account of

RUNNING EXPENSES.

The arrangement of the details of expenditure which follows is intended to furnish such information as is desired by the public, and is in accordance with suggestions received from various sources. Items of payment to the same individual at sundry times are included in the aggregate amount given, if paid for the same objects. Every effort has been made to ascertain and pay all the bills for the current year; and in all cases, so far as known, payments of rent. etc.. have been made to December 31, 1893, and salaries and committee service have been paid for the full municipal year. The expenses of the year, which are included in the general running expense, may be seen in the aggregate at the end of the detailed account here given. This is intended to include interest, but not the payment of maturing bonds.

		\$635,000.00

REPORT OF WATER COMMISSIONERS.

To the City Council:

The Board of Water Commissioners respectfully submit their report for the year ending December 31, 1893.

The report of the superintendent, which is made a part of this report and to which your attention is respectfully invited, shows a large amount of work accomplished during the year 1893; it also gives the cost and maintenance of the work.

The years of 1892 and 1893 have been marked years in the history of this department, and a large sum has been expended in perfecting the water-works system of the city and securing rights which will become valuable in years to come. No department has more demands upon it, and none seems more important in supervision and care. The work of the year has been of a necessary character, and the good results already derived therefrom have justified the expenditure.

PUMPING STATION.

The pumping station has been completed and presents a most attractive appearance, second to none in its arrangements and in the facility with which the work is performed. The pumpingengine was delivered to the city early in the year, and the final test was made by an engineer sent by the maker, Henry R. Worthington of New York city, and by our engineer, Henry A. The result of the test was most satisfactory, the engine performing a higher duty than was guaranteed, and in every respect stood the strain upon it and did its work in the best possible manner. The results since obtained have been satisfactory. The whole plant has attracted many visitors from outside our city, and the estimate placed upon it by experienced engineers and contractors is very gratifying. The care of the station is in charge of Henry A. Rowell, whose ability is demonstrated by his management and careful supervision, and we feel that he is the right man in the right place.

GATE-HOUSE.

The gate-house has been completed during the year and is fully described in the report of the superintendent. Its advantages are apparent; the old gate-house was inferior and ill-fitted to do the work demanded of it, but we consider that this one, substantially built and fully equipped, will meet all requirements for years to come.

PENACOOK LAKE.

The commissioners have continued their policy of securing the land bordering on the lake, and have obtained by purchase about ninety-three acres during the year, which gives the city the control of the greater part of the land lying on the westerly side of the lake, and it is their hope to continue the same policy as opportunity is afforded. The last two years have been exceptional ones on account of the low water in the lake, and we have taken advantage of this by doing a large amount of work along the shores, thus obliterating many objectionable features which have hitherto existed. We call your attention to the protection of our water supply by every possible means, and it is hoped that your board will pass such ordinances as may seem necessary to this end.

RESERVOIR.

Quite a little work has been done around the reservoir, but we hope in the coming year to be able still further to improve the grounds surrounding it and complete the plans already suggested in previous reports.

WATER-RIGHTS.

During the year the opportunity was presented to the commissioners to secure the water-rights in Long pond in Webster, owned by Charles H. Amsden. The matter was investigated very thoroughly by the board, and at their request, the city engineer made careful surveys to determine the practicability obringing the water to our city and to ascertain a feasible route for the same. This pond is finely located at a height of about

thirty-five feet above our present supply, with sandy bottom and excellent surroundings, and by analysis the water is shown to be equal in character to that of Penacook lake. The commissioners unanimously decided to buy this water-right, for which they paid the sum of \$5,000. This will give the city an additional supply of water, adequate to meet all the needs and protection against any failure or insufficiency of the present supply.

FINANCIAL.

A temporary loan has been granted by your board of \$15,000 to carry on the needed improvements during the year. An ordinance has also been passed providing for the refunding of \$130,000 of 6 per cent. bonds becoming due April 1, 1894, and a note of \$40,000 due in March, 1894, thus leaving only \$20,000 of 6 per cent. bonds still outstanding. We feel that under the present earning capacity of this department, we shall very soon be able to retire a certain amount of bonds each year, and the new issue is so arranged that such an end will be accomplished, as it is the policy and desire of the commissioners to retire as fast as possible the outstanding indebtedness upon the works.

It will be seen by the report of the superintendent that a large quantity of water is wasted during the year, and we have instructed him to place meters where large quantities of water are being used or where it is being wasted.

During the year the membership of the board has changed; the term of office of James L. Mason and Joseph H. Abbot having expired, Solon A. Carter and Frank D. Abbot were chosen to succeed them. Mr. Mason was elected to the board in 1878, and has ever been an active and efficient member, taking great interest in the work of the department and devoting much time to it. Mr. Abbot has been a useful member of the board since 1884. In the death of James H. Chase, the board lost an esteemed member, whose good judgment and experience were of much value. During the existence of the board of water commissioners, this is the second death to be recorded of a member during his term of office. We desire to place upon record our appreciation of the service of these faithful and efficient members. William M. Mason was chosen to succeed Mr. Chase.

We also desire to express to the city council our appreciation of the coöperation and aid received from them, and for the confidence placed in us; for in the expenditure of so large an amount of money there has been no little responsibility, and the commissioners have cheerfully given their time and experience for the best interests of the city.

The duties of the superintendent have been peculiarly ardnons during the past few years, and much credit is due him for the quality of the work and the satisfactory manner in which it was performed.

All of which is respectfully submitted.

SOLON A. CARTER,
FRANK D. ABBOT,
JOHN WHITAKER,
HENRY E. CONANT,
WILLIS D. THOMPSON,
WILLIAM M. MASON,
GEORGE A. YOUNG,
WILLIAM P. FISKE,
PARSONS B. COGSWELL, ex officio,
Water Commissioners.

REPORT OF THE SUPERINTENDENT.

To the Board of Water Commissioners:

I herewith present to you the twenty-second annual report of the operations of this department, showing the receipts, expenditures, and abatements, together with a statement of extensions and improvements made during the year ending December 31, 1893.

V. C. Hastings, eash paid out,	
Pay-roll, labor,	
• , ,	 \$55,147.66
The expenses are divided as follows:	
For management and repairs,	\$3.715.87
new service-pipes,	
new distribution-pipes,	
maintenance of pumping station, .	
construction of pumping station, .	
pumping machinery,	
inspection,	
damages and expenses of freezing.	
reservoir grounds,	
new gate house,	
work on shores of Penacook lake, .	
land around Penacook lake	
water rights and legal expenses,	1
meter account,	
incidentals,	

The annual income has increased \$4,016.33 over that of 1892, and it is pleasant to record that we have not been compelled to shut off a supply to enforce collection since 1887.

EXTENSIONS AND IMPROVEMENTS.

Main- and distribution-pipes have been laid and hydrants set, during the year, as follows:

In School street,

east from Tahanto street, 12 feet 10-inch pipe.

In Centre street.

west from High street, 366 feet 8-inch pipe.

In Minot street,

north from Odd Fellows' Home, 355 feet 6-inch pipe.

In Woodman street,

east from Minot street, 59 feet 6-inch pipe.

In Chestnut street,

north from Auburn street, 265 feet 6-inch pipe.

In Pillsbury street,

east from Broadway, 508 feet 6-inch pipe.

In Pillsbury street,

west from Eastman street, 50 feet 6-inch pipe.

In Warrenston street,

extended east, 105 feet 6-inch pipe.

In Glen street,

extended south, 240 feet 6-inch pipe.

In Peabody street, West Concord,

east from Main street, 340 feet 6-inch pipe.

In River street, West Concord,

south from Peabody street, 156 feet 6-inch pipe.

In Bradley street,

south from Church street, 243 feet 4-inch pipe.

In Albin street,

west from Bradley street, 462 feet 4-inch pipe.

In Ford's avenue,

west from Green street, 320 feet 4-inch pipe.

In Elm street,

north from Fayette street, 158 feet 4-inch pipe.

In Budger street,

south from Harrison street, 46 feet 4-inch pipe.

In Hall street,

extended south to near Hammond street, 408 feet 4-inch pipe.

In Pleasant street,

from Pine to Liberty street, 444 feet 10-inch cast-iron pipe, relaid in place of 6-inch cement-lined.

In Warren street,

from Tahanto to Pine street, 345 feet of 8-inch cast-iron pipe, relaid in place of 6-inch cement-lined.

In Warren street,

west from Liberty street, 695 feet 8-inch cast-iron pipe, relaid in place of 4-inch cement-lined.

In Kimball street,

north from Allison street, 168 feet 4-inch pipe.

In Eastman street,

south from Allison street, 400 feet 4-inch pipe.

In Pine street,

from Warren to Pleasant street, 681 feet 8-inch cast-iron pipe, relaid in place of 4-inch cement lined.

In Pine street,

from Centre to Warren street, 985 feet 6-inch cast-iron pipe, relaid in place of 4-inch cement-lined.

In Tahanto street,

from School to Warren street, 615 feet 6-inch cast-ironpipe, relaid in place of 4-inch cement-lined.

In Orchard street,

from Merrimack to Pine street, 620 feet 6-inch cast-iron pipe, relaid in place of 4-inch cement-lined.

In Washington street,

from Perry avenue to Centre street, 855 feet 6-inch castiron pipe, relaid in place of 6-inch cement-lined.

IN PENACOOK.

In West Main street.

south from Main street, 1,284 feet 6-inch pipe and 1 hydrant.

In Union street,

extended west, 36 feet 4-inch pipe.

On hydrant branch, 7 feet 6-inch pipe.

There has also been laid on the main line, near the new gate-house, the following amount of pipe:

120 feet of 12-inch pipe.

107 feet of 14-inch pipe.

195 feet of 16-inch pipe.

15 feet of 18-inch pipe.

862 feet of 20-inch pipe.

282 feet of 24-inch pipe.

Summary of the Foregoing.

Pipes.	Hydrants.	Stop-Gates.

and distribution- pipes now in use,	,	
272,232 feet, —equal to 51.56		
miles.		

SERVICE-PIPES.

There have been laid during the year, and connected with the main-pipe, 114 service-pipes, consisting of,—

111 1-inch,	2,804	feet.
2 2-inch,	47	"
1 6-inch,	36	4.6
114	2,887	feet.

Whole number service-pipes, 2,836; number discontinued, 8; number in use at the present time, 2,828.

Whole number feet, 66,401, equal to 12.58 miles.

The following table shows the height of water in Penacook lake on the first day of each month:

January,		171.20	July, .		175.80
February,		169.95	August, .		175.45
March,		170.40	September,		174.70
April,		172.70	October, .		173.50
May,		174.70	November,		173.00
June,		176.40	December,		172.85

The lowest point reached was February 1, being 169.95; the highest was May 25, 176.45;—mean height, 173.38, which was .94 foot lower than during the year 1892.

We have taken advantage of the continued low water to clear the shores of Penacook lake, especially that part known as Forge pond, from which muck, stumps, and decaying matter have been removed in large quantities.

The expense of maintenance of the works was greatly increased by the severe winter of 1892-'93; a large force of men was kept busy throughout the winter thawing pipes and repairing leaks on the high service.

Our first work in the spring was on the pipe lines which had occasioned so much trouble by numerous breaks. About one mile of cement-lined pipe was relaid with cast-iron pipe of a larger size. This work added greatly to the distribution-pipe account. We were also obliged to make new connections for the services on these lines, thus increasing the service-pipe account.

The barn known as the Bradley barn, which stood on the pumping station lot, has been somewhat remodeled and makes an excellent storehouse.

The house to house inspection inaugurated this year has proved a great help in locating and preventing waste of water.

I have caused analyses of the water of Penacook lake to be made, which are presented herewith, and demonstrate the continued excellence of our water-supply.

NEW GATE-HOUSE.

The new gate-house below the dam, which has long been needed, has been constructed according to plans approved by you. The building cost \$9.869.65, and was built in the most substantial manner.

Excavation was made to hard pan, a stone bed-course was laid and the sub-structure was built upon this. The ontside walls were of rubble masonry, laid in cement mortar, twenty-two feet in height, four feet thick at the bottom, plumb on the inside face, with a uniform slope on the back to two feet thick at the top. This wall was lined with one foot of hard-burned brick, laid in equal parts of cement and sand. The partition walls were also of brick, those running lengthwise of the building being two feet thick, and the cross-walls, three feet thick.

The inside dimensions of the gate-house are 19 by 23 feet. and the interior is divided by the partition walls into three series of wells, 22 feet deep, with cement floors. enters the gate-house through two 16-inch mains, emptying into a receiving well, 18 by 3 feet; the supply for the pump-main flows from this general well, through a 14-inch pipe, into a small one three feet square; from these two wells, the water flows through five 14-inch gates into five screening wells, six feet nine inches by three feet six inches, divided in the centre by two sets of screens, each of one eighth inch mesh. After being screened, the water flows through five 14-inch gates into three distributing wells, one three feet square supplying the Penacook main; the centre one, thirteen by three feet, supplying the present low service system in the city, and also connected with a plugged main, intended for future use; the third well, three by three and one half feet, supplying the pump main. these mains are 20-inch east-iron pipe through the wall and for some distance below, there connecting with the old mains. The three distributing wells are so connected that any or all mains may be supplied through any of the screening wells or from either of the receiving wells.

A 24-inch pipe connects the gate-house with the 24-inch main formerly used by the Concord Manufacturing Company, through the pump receiving well, in case the 16-inch mains should be disabled in any way; this 24-inch main was also continued to below the gate-house, and connected with the three supply mains, so if any difficulty should arise in the gate-house, the city can be furnished with water through this main, entirely independent of the gate-house. A 20-inch main was laid through the wall of the gate-house to the dam in provision for coming years.

A system of drain-pipes is laid throughout the gate-house, with an opening for each compartment; each well can be closed from all others, the water drained out and the pit cleaned, without stopping the flow of water through any main, for one moment. An arrangement has been devised whereby the screens are lifted out, run out of the building and washed by water pumped on them.

The superstructure is of brick with trimmings of Concord granite. The total amount of stone masonry was 309.6 cubic yards, and about 150,000 brick were used in the building. The stone masonry was laid by John R. McDonald; the brick-work was done by Rowell & Plummer by the day, and the brick was furnished by Samuel Holt; the wood-work was done by E. B. Hutchiuson, and the painting by George Abbott, Jr.

The building has already proved itself a valuable acquisition to the works both by increased screenage and by a better arrangement of distribution.

HIGH SERVICE.

The new high service system has worked very successfully during the year, and for details of the operation of the pump, I would refer you to the accompanying report of the engineer.

The pumping expenses of the year are as follows:

Cost of fuel n	sed,					\$1,212.47	
Salaries, engir	ieer an	d fire	man,			1,269.00	
Cost of oil, w	aste,	packi	ng ai	nd ot	her		
supplies,						174.44	
Gas consumed							
							
Total p	umpin	g exp	enses	;,			\$2,716.30

The account of maintenance of pumping station is larger than the actual pumping expenses of the year, as it covers cost of coal used in December, 1892, as well as of supplies now on hand, including ninety tous of coal, about five months' supply.

We have expended \$699.94 in grading the slopes of the reservoir, and this work should be continued from year to year until the whole reservoir grounds are graded.

METERS.

You will see by the engineer's report that nearly 180,000,000 gallons of water were pumped during the year; this is an excessively large quantity for the population of the high service district and shows a very extravagant waste of water, while there is doubtless an equal waste by the consumers of the low service.

The problem of waste of water is one that comes to nearly every water department, and by the examination of reports of other cities, I find that the use of meters is to a great extent becoming universal as the only effective method of solution. Col. William Ludlow, late chief engineer of the Philadelphia water-works, says on this subject,—

There are but two practicable methods of checking this waste, viz., by a system of inspection and enforcement of penalties, and by measuring and charging for the quantity taken. The former plan involves domiciliary visiting, always cumbersome and objectionable, and . . . is in the nature of things, an approximation only to an effective method. Actual measurement is preferable as being more exact, automatic, effective, and equitable.

The water meter is merely a sleepless and tireless machine, not susceptible to bribery or violence without discovery, requiring little attention and recording actual consumption, regardless of the disposition made of the water which passes through it.

With the meter registering waste, defective appliances will be repaired, carelessness of servants and employees corrected, the water-closet will have a proper flushing tank instead of a constant flow, and the water will not be used in the winter to protect a badly laid pipe from freezing, or the owner from a plumbing bill. The waste from these sources, though of no great apparent amount in a single instance, when multiplied by the immense number in use, represents a formidable quantity, which, having been brought from the source of supply, flows to tide water without having served any useful purpose whatsoever.

I am convinced that in our own city, three fourths of the consumption of water is wasted. Statistics show that in cities where the meter system is used, the daily consumption for all purposes including fire and manufacturing uses, is from thirty to not over sixty gallons per capita, and according to this estimate, with such a system, we would have pumped about 50,000,000 gallons, instead of 180,000,000 gallons.

The testimony of all cities and towns that have adopted the meter system, is wholly in praise of it, both as a waste detector and preventor, and as an agent for perfect equalization of rates. In connection with the last named use of the meter, I would say that recommendation of its adoption, is in no way connected with desire for increase of income. The first effect of its introduction will be to increase the rates in many cases, but it has been the experience of other cities, that after the first payment has shown the owners of buildings the necessity of proper care, they are able to obtain an abundant supply of water at the same or lower rates than were paid under the old method.

One city reports: "The large consumers have reduced their consumption of water from twenty to seventy per cent. without affecting their industries to any extent and without causing them much inconvenience. The quantity of water saved by the use of meters is so large that we have been saved from a water-famine by their use."

Another city records of the system: "It has now been well tested and is considered by the citizens as a much more satisfactory and equitable manner of charging for water than was the former method by rates."

In our own experience with meters, the consumers, as a whole, are pleased with the results. In some cases where the consumption is unusually large, it is difficult to convince the consumer that there is nothing wrong with the meter; he seems to think that only water actually used is registered, leaks and waste having no effect on the meter, but the system is generally satisfactory.

I would therefore recommend the general adoption of meters, both in public blocks and private dwellings. A large part of the waste is in tenement houses, caused both by defective plumbing and earelessness of tenants; but I wish to state that in nearly all cases where notices of waste have been sent, the owners have been prompt to repair the plumbing. That some of the waste in the city has actually been stopped by inspection, is clearly shown by the increase of water pressure, and I am confident that under a meter system it would be raised considerably higher.

When a man knows he is paying by actual measurement, he

is a detective to himself and to his household, and all unnecessary waste is reduced to the minimum; plumbing is kept in the best possible condition, and neglected faucets and closets used to continuous flow, suddenly find a thoughtful and attentive owner. Should the meter system be adopted in general or in part, I am sure that it would give satisfaction both to the water department and the entire community.

Respectfully submitted:

V. C. HASTINGS,

Superintendent.

REPORT OF THE ENGINEER OF THE PUMP-ING STATION.

Pumping Station, Concord Water-Works.

V. C. Hastings, Superintendent:

Sir: I would report that the machinery at the pumping station is in good working condition.

The pumping engine is a Worthington triple expansion, with independent air pump and surface condenser; has steam cylinders, 9 inches, 14 inches, and 22 inches, and plungers 12 inches in diameter, with a stroke of 18 inches.

Following will be found a statement of coal and other supplies used at the pumping station during the year, with a table showing the work for each month.

Statement.

147 tons 1,129 lbs. Cumberland coal, 61 tons 800 lbs. Pocahontas coal,

66 gallons of oil. 100 lbs. of waste.

ENGINE RECORD.

DATE.	Pumping time. h. m.	Water pumped.	Daily average pumped.	Total coal burned.	Daily average coal burned.

This is excellent water.

REPORT BY PROF. E. R. ANGELL.

Derry, N. II., November 3, 1893.

Mr. Hastings:

Dear Sir: I have made a very careful analysis and bacteriological examination of the four samples of water which you sent. Every sample is excellent water. No bacterium, capable of living at the temperature of the human body, is present, consequently there are no disease germs in the water.

Sample at the intake contains only one bacterium per 1-100 c. c., while sample 1,000 feet into the lake contains two. I think the explanation is this: The number of bacteria in a pond diminishes from the surface toward greater depths, and, if the pond is very deep, far below the surface they may disappear altogether. At the intake some of the deep water is mingled in the flow with the surface water, giving a lower number of bacteria. Regarding the bacteria in samples 3 and 4, the number most likely varies with the time and distance of the flow. If No. 4 is longer in getting from the source—i. e., the lake—than is No. 3, then we should expect it to contain more bacteria. I wish you would inform me whether this is probably so.

Yours very truly,
[Signed] EDMUND R. ANGELL.

AUDITOR'S REPORT.

Concord, N. H., January 8, 1894.

To the Board of Water Commissioners:

I certify that I have examined the books showing the receipts of the Concord Water-Works from January 1, 1893, to December 31, 1893, and find the same correct, and that the total amounts given therein correspond with the amount of receipts given by the supertendent, V. C. Hastings, in his report for the year.

ARTHUR H. CHASE, Auditor.

TREASURER'S REPORT.

W. F. Thayer, Treasurer.

STREET DEPARTMENT.

REPORT OF COMMISSIONER OF HIGHWAYS.

To the City Council:

During the past season quite a number of catch-basins have been constructed and old ones repaired on the different streets, and an account of the expense of the same may be found in the statement of the expenditures.

A furnace has been built on the east side of the river, near the Loudon bridge, for the burning of the rubbish that is collected by the city and job teams. The teams attend to the weekly cleaning up on Main street in the evening, instead of the day-time.

An extra two-horse team has been added to the highway department, and is kept at the city sheds. I would recommend that another one be purchased, as good use can be made of it.

A shed 86 feet in length has been built on the city lot, to store the sprinklers that were purchased in 1893; and the fence around the city sheds has been repaired.

Five new sprinklers were bought the past season in consequence of the establishing of a sprinkling precinct. The number of sprinklers on hand is 9, and, if the precinct is not enlarged, they will do the work. An appropriation of \$3,000 will suffice to pay the expense.

I would recommend the purchase of a steam road-roller, of about 12 tons weight. In the matter of labor in the construction and repairing of streets, it would cause quite a saving of expense to the city.

Respectfully submitted:

ALFRED CLARK,

Commissioner of highways.

REPORT OF THE COMMITTEE ON SEWERS AND DRAINS.

To the City Council:

The ordinance creating an engineering department, passed March 14, 1893, provided that the city engineer "shall act as clerk of the committee on sewers and drains, and shall keep a full record of the doings of said committee." This requirement has been carried out to the letter, and a record of the business transacted by the committee is preserved in permanent form, in a book provided for that purpose. The number of meetings held during the year was fifteen, and frequent inspections of the sewer work while in progress were made by the several members of the committee. The season was a favorable one for sewer work, commencing in May and ending in October. It was deemed advisable to solicit bids for such sewer pipe as would be needed during the year, and eight bids were received, as follows:

Thompson & Hougue, up to and including 24-inch, 77 per cent. discount from list prices; for 30-inch, $2\frac{1}{4}$ inches thick, 57 per cent. discount; for 30-inch, 2 inches thick, 59.2 per cent. discount.

Isaac Baty, up to and including 24-inch, 76.5 per cent. discount; 30-inch, no bid.

George D. Goodrich, up to and including 24-inch, 76.5 per cent. discount; 50-inch, no bid.

Portland Stone Ware Co., up to and including 24-inch, 75 per cent. discount; Portland deep and wide socket pipe, up to and including 24-inch, 65 per cent. discount; double strength pipe, 12-inch to 24-inch, 50 per cent. discount; double strength pipe, 30-inch, 40 per cent. discount, and the freight to your station in carload lots.

N. S. Gale & Co., for use in Penacook only, 75 per cent. discount.

Humphrey & Dodge, for the 30-inch, \$5.50 per foot less 55 per cent., delivered on cars here: 8-inch to 24-inch, for 75 per cent.

Blackmer & Post Pipe Co., 8-inch, 3 inch thick, 21 cts.; 9-inch, 7-8

inch thick, $25\frac{1}{2}$ ets.; 10-inch, 7-8 inch thick, $30\frac{1}{2}$ ets.; 12-inch, 1 inch thick, $37\frac{1}{2}$ ets; 14-inch, 1 inch thick, 49 ets.; 15-inch, 1 1-8 inch thick, $54\frac{1}{2}$ ets.; 16-inch, 1 1-8 inch thick, $61\frac{1}{2}$ ets.; 18-inch, $1\frac{1}{4}$ inch thick, $78\frac{1}{2}$ ets.; 20-inch, 1 3-8 inch thick, \$1.09; 21-inch, 1 3-8 inch thick, \$1.16; 22-inch, $1\frac{1}{2}$ inch thick, \$1.31: 24-inch, $1\frac{1}{2}$ inch thick, \$1.68: 30-inch, 2 inches thick, \$3.25.

D. W. Lewis, up to and including 24-inch, 76½ per cent. discount: 30-inch, no bid.

The bid of Messrs. Thompson & Hoague was accepted, and the pipe furnished by them arrived in good condition from the manufactory and was satisfactory in quality.

The North End and South End sewers, granted in 1892 and partly laid the same year, received early attention. No appropriation having been voted, or provision made for issuing bonds to cover their construction at the time they were granted, it became necessary to provide for means to continue the work upon them. This was done by the passage of the following joint resolution, by the city council, July 24, 1893:

City of Concord, in the year of our Lord one thousand eight hundred and ninety-three.

A RESOLUTION AUTHORIZING A TEMPORARY LOAN FOR SEWERS.

Resolved by the City Council of the City of Concord as follows:

That the city treasurer be and hereby is anthorized to borrow, on the credit of the city, a sum not exceeding twenty-five thousand dollars, for the purpose of defraying the expense of constructing sewers in the city sewerage precinct, and the same is hereby appropriated for that purpose; and said sum so expended is to be paid back into the city treasury from the sale of bonds which are hereafter to be issued by said city to cover the amount so used.

Of the money thus provided, the sum of \$7,367.90 was appropriated to pay the deficiency occasioned by work on the North End and South End sewers in 1892; \$9,000 was appropriated to complete the North End sewer, all of which was expended in 1893; and \$8,632.10 was appropriated to continue the work on the South End sewer. Of the South End sewer appropriation, \$4,178.21 was expended in 1893, leaving an unexpended balance of \$4,453.89.

Daniel Higgins declined to accept the award of \$25 made to

him for damage occasioned by the laying of the North End sewer through his premises in 1892, and took an appeal to the April term of the supreme court. An agreement was made by the city solicitor and counsel for Mr. Higgins, by which the award for damages in full to Mr. Higgins was fixed at \$150, and the same awaits the approval of the board of mayor and aldermen.

The petitions for sewers, referred to the committee, were disposed of as follows:

George Barnes et als., for sewer on Centre street, granted and laid.

Fred Reed et als., for sewer on Auburn street, granted and laid to Chestnut court.

N. E. Martin et als., for sewer on Valley street.

Albin & Martin, for sewer on Albin street, granted.

J. H. Goodrich, for sewer east of Main street, granted and laid.

George M. Perkins et als., for sewer on North State street, granted.

Fred A. Carr et als., for sewer on Holt street, granted and laid.

G. D. B. Prescott et als., for sewer on Pillsbury street.

Mary F. Tilton, for sewer on Broadway, granted and laid.

L. Jackman, relaying and lowering School street sewer from Main street west, granted and laid.

- W. H. Page, for sewer in Hall street.
- G. L. Theobald et als., for sewer in Clinton street west of Spring street.
- J. E. McShane et als., for sewer in Clough's avenue.

The following petitions were laid on the table for further action:

- W. H. Page, for sewer in Hall street.
- G. L. Theobald, for sewer in Clinton street.
- J. E. McShane, for sewer in Clough's avenue.
- N. E. Martin, for sewer in Valley street.
- G. D. B. Prescott, for sewer in Pillsbury street.

Petitions granted and left over by previous committee:

Beacon street, from White to Charles street, laid 1893. Charles street, laid 1893.

Eastman street.

Broadway, from Allison to Humphrey street.

Humphrey street.

Sexton's avenue, laid 1893.

Centre street, from Pine street to F. N. Ladd's house, laid 1893.

Allison street, from the South End sewer to Eastman street, granted and 392 feet laid in 1892; 324 feet laid in 1893.

North End sewer, built to and across Ferry street in 1892; completed in 1893.

The appropriation for sewers in the city precinct, for 1893, was \$7,000. The total expenditures were \$7,457.71, thus overdrawing the appropriation \$457.71. This was caused by the purchase of a hoisting-engine, house for the same, and a steampump, which add more than \$1,000 to the assets of the precinct. The tool account for the year is as follows:

Paid for hoisting-engir	ıe,					\$850.00
house for sam	ie,					69.17
steam-pump,						181.45
picks, pick-ha	ndles	s, and	l shov	els,		45.58
cement-pails,						18.00
tool-boxes,						6.80
brass number	chec	ks,				7.00
trucking, .						42.00
Total, .						\$1,220.00

Tools on hand December 31, 1893, belonging to city precinct sewer department:

Double drum hoisting-engine, and house for same; 1 steam-pump, 4 Edson pumps, 90 feet of suction hose, 4 spanners, 4 strainers, 36 round-pointed shovels, 23 square-pointed shovels, 6 long-handled round-pointed shovels, 5 steel bars, 4 axes, 58 picks, 64 pick handles, 12 cement-pails, 23 pairs rubber boots, 7 wooden mauls, 1 brick-hod, 12 hand drills, 3 saws, 3 chains, 2 striking hammers, 1 set of iron blocks, 2 monkey wrenches, 2 hand hammers, 3 hoes, 3 water-pails, 4 dippers, 1 two-gallon wooden oil-bucket, 1 one-gallon tin oil-can, 2 pairs pipe tongs, 9 lanterns, 2 Edson pump diaphragms, and 4 tool-boxes.

Work on the North End sewer was commenced near the north line of Ferry street, and the sewer was completed to the foot of Walker street in State street, in accordance with the original plan. There was built during the season of 1893, 1,930 feet of 24-inch x 36-inch brick sewer, and 423 feet of 30-inch pipe, 903 feet of 24-inch pipe, and 363 feet of 18-inch pipe were laid, at a total cost of \$9,350.01. The special appropriation of \$9,000 was overdrawn \$350.01.

Work on the South End sewer was carried forward during the season of 1893. The depth of cutting, and the nature of the material excavated, made this by far the most expensive sewer work yet done by the city. Of the special appropriation of \$8,632.10, there was expended \$4,178.21.

PENACOOK SEWER PRECINCT.

The following petitions were received from this precinct: George N. Dutton, for sewer in Pleasant street. Granted, and laid.

Henry Rolfe, for sewer in Penacook street. Granted, and laid.

In this precinct 970 feet of 10-inch sewer pipe has been laid—750 feet in Pleasant street, and 220 feet in Penacook street—all of which has been paid for from the tax raised in the precinct during the present year. In addition, the sewers have been thoroughly flushed twice during the season, and found in good condition.

Though the sewer system in this precinct is practically completed, and all the thickly settled portion of the precinct is supplied with good sewer facilities, a large percentage of the dwellings are still unconnected, and their sewage is deposited on the surface of the ground, or in cesspools, a constant menace to the health of the community. The attention of the board of health is called to this fact, with the recommendation that the matter be attended to during the coming summer, and the city ordinance relating to sewers and drains enforced.

The property of the precinct is as follows:

One derrick, 1 Edson pump, 16 feet of suction pipe, 30 picks, 2 ironbars, 1 striking hammer, 1 hand hammer, 1 tool-box, 6 12-inch Ys, 1 8-inch Y, 20 feet of 18-inch pipe, 140 feet of 15-inch pipe, 14 feet of 12-inch pipe, 60 feet of 10-inch pipe, 16 feet of 8-inch pipe.

The following is a financial statement of the receipts and expenditures for the year:

RECEIPTS.		EXPENDITURES.								
Balance from last year, Appropriation, Pipe sold,	. 900.00	Labor on new sewer Pipe,	. 145.32 . 9.00 . 10.00 . 16.95 . 8.73 . 6.00							
	\$979.09		\$979.09							

New pipe laid, 970 feet, 10 inch. Average cost per foot, 67 cents. Material excavated, sand, gravel, and boulders.

WEST CONCORD SEWERAGE PRECINCT.

The system of sewers for the West Concord precinct, which was commenced in 1892, was completed this season. The trench through Main street north from the southern outlet to the power station of the Concord Street Railway, was about fifteen feet deep, and the bottom of the trench for a greater part of the distance was rock work, thus increasing the cost of the work materially. In High street, near the Concord & Claremont track, ledge was found which was removed with some difficulty, as the track had to be kept open for travel at all times.

Cost of sewers laid in 1893:

Paid for labo	r, .						. 5	5,164.24

			\$8,005.87
Expenditures,			$5,\!872.53$
Balance December 31, 1893,			\$2,133.34

Pipe laid in 1893: 764 feet of 15-inch, 1,944 feet of 12-inch, 1,898 feet of 10-inch. Total length, 4,606 feet. Average cost per foot, \$1.26. Material excavated, gravel, sand, boulders, and solid rock.

Tools on hand belonging to this precinct:

One Edson pump, 20 feet of suction hose, 2 derricks, 2 sets of blocks and ropes, 35 picks, 28 pairs of rubber boots, 3 grub hoes, 3 long chains, 2 short chains, 28 pick handles, 2 iron mauls, 1 wooden maul, 31 round-pointed shovels, 10 square-pointed shovels, 3 long-handle shovels, 22 lanterns, 3 steel bars, 4 tag ropes, 24 drills, 11 plug drills, 6 points, 1 axe, 1 water pail, 1 hand hammer, 2 striking hammers, 1 nail hammer, 1 sledge hammer, 1 wood saw, 1 hand saw, 1 branding iron, 1 oil can, 1 hoe, 1 mortar bin, and 1 wheelbarrow.

Pipe on hand December 31, 1893: 2 two-foot 12 inch Ts; 2 two-foot 15x6 inch Ys; 6 three-foot 15x12 inch Ys; 3 three-foot 15x12 inch Ts; 875 feet of 10-inch pipe.

The total length of sewer built in the city in 1893 was 14,898 feet, of which 2,254 feet were brick in the city precinct, and 12,644 feet Akron pipe. Of the pipe 7,068 feet were laid in the city precinct; 4,606 in West Concord precinct; and 970 feet in Penacook precinct.

Calls for use of the city sewer pumps became so frequent that the committee fixed a charge of \$1 a day per pump when loaned. The following is the account for use of city sewer pumps:

JAMES H. SANDERS,

Committee on Sewers and Drains.

REPORT OF CITY ENGINEER.

Office of the City Engineer, Concord, N. H., December 30, 1893.

To the City Council:

I have the honor to submit the first report from this department, from its organization in March to December 31, 1893. After entering upon the duties of this office, I found that the general public supposed that a much wider range of work came under my supervision than is actually the fact. A careful reading of the ordinance creating this department will make the duties accompanying it more plainly understood by all.

NEW SEWERS.

The total length of new sewers laid the past season, including relaying Bowery avenue, was 9,322 feet in the city proper, 4,606 feet in West Concord precinet, and 970 feet in Penacook precinet. The material used was brick and vitrified pipe. The brick sewer laid was of the egg-shaped pattern, 24x36 inch; the pipe sewers were from 8 inches to 30 inches in diameter. A statement of the cost of sewers built this season will be found in this report.

It would probably result in the saving of a large expense, if the sewers were built by contract instead of by day work; this would, of course, require the constant attendance of an inspector on the work, but the amount required for his services would be amply repaid by the quality of work performed. Sewers should be carefully laid on the grades as given to the workmen, and not as suits the foreman or disinterested spectators. Good service in sewers can only be obtained where the utmost care is used in their construction, and when properly constructed they prove a source of small expense to maintain. All parties connecting with the public sewers should use the openings left for their premises, and not cut into the pipe wherever they choose. The health officer during the past season has, I think, tried to have this done in all cases.

NORTH END SEWER.

Work was commenced where it was suspended in 1892, at a point 20 feet north of the northerly line of Ferry street, and the sewer was laid in accordance with the original plan to the foot of Walker street at State street. This sewer, as now built, extends from a point just above the Loudon bridge, northwesterly across the intervale to Penacook street, near the works of the Page Belting Co., thence westerly along Penacook street, under the tracks of the Northern railroad and the Claremont railroad, to the easterly side of State street, thence southerly to the foot of Walker street. This sewer will fill a long-felt want and relieve the old 20-inch outlet, which has caused some trouble in times past by overflowing and backing into cellars connected with it.

SOUTH END SEWER.

Work was continued on this sewer under the same difficulties as in 1892, so far as the material excavated was concerned. The depth of cutting, which averages 20 feet, in sand, clay, and quick-sand, makes it next to impossible to curb the ditch and hold it in place while the masonry is being built. The introduction of steam-hoisting apparatus materially aided the excavation. The expense attending this work exceeds any previous sewer work done by the city.

LOUDON BRIDGE.

The matter of repairing this bridge was brought to the attention of the city council, and a report on its condition was asked for by that body. Samuel F. Patterson was employed to examine the structure and report as to the advisability of repairing the same. His report satisfied the city council that economical repairs could not be made to the old structure, and

they voted to rebuild the bridge, substituting iron for wood, and instructed Alderman Ranney, Councilman Forrest, and the city engineer to make arrangements with some competent bridge engineer to make plans for a new iron bridge to replace the old wooden bridge, and report to the city council, with plans for their approval, at some later meeting. This committee employed John E. Cheney, C. E., of Boston, to make the necessary plans, which were presented to the city council at the August meeting and were adopted. The bridge, when completed, will be a credit to the city and its designer.

A special committee, consisting of the committee on roads and bridges, with the addition of the mayor, Alderman Sanders, Councilman Dodge, and the city engineer, were appointed to ask for bids and award the contract. The committee, as revised, is the mayor, Alderman Ranney, Emery, Sanders, Councilman Forrest, Engel, Dodge, and the city engineer.

Bids were received from fifteen different parties. The bids were asked for in two ways, one including the removal of the old bridge by the bidder, and the other requiring the city to remove the old bridge on three weeks' notice from the successful bidder that they were ready to commence the erection of the new work. Bids were received by the committee until 7 p. m., August 21, 1893, and were as follows:

	No. 1.	No. 2.
Schultz Bridge Co.,	\$25,250	\$24,500
Rochester Bridge and Iron Works,	21,313	20,213
Wrought Iron Bridge Co.,	18,180	17,900
Groton Bridge and Manufacturing Co.,		18,720
Berlin Iron Bridge Co.,	17,662	17,362
Philadelphia Bridge Co.,	18,730	$18,\!220$
Boston Bridge Works,	18,935	18,935
Toledo Bridge Co.,	$18,\!479$	17,979
Dean & Westbrook,		20,530
New Jersey Steel and Iron Co.,	20,817	20,317
Massilon Bridge Co.,	19,460	18,960
J. E. Buddington,	23,500	23,500
R. F. Hawkins,	18,650	
Penn Bridge Co.,	20,298	$20,\!298$
Edge Moor Bridge Co.,	19,839	19,659

The bid of the Berlin Bridge Company, being the lowest, was accepted, and a bond of \$6,000 was required for the faithful performance of the contract. After some delays in procuring material, the Bridge Company were ready to commence the shop work, but not in season to complete the contract on the specified date. Work was commenced at the bridge site on December 27, 1893, and is now going on.

There has been expended up to December 31, 1893, the following:

Paid for labor on masonry,				\$277.40
stone;				83,50
trucking,				23.00
hardware,				1.85

Appropriation,			. \$	20,000.00
Expended,				514.43
Balance December 31, 1893,			. *	19,485.57

CITY ENGINEER'S OFFICE AND WORK.

The plans and records of this office accumulate rapidly, and some provision should be made for properly storing the same. A suitable plan case can be built at a small expense, and would prove a great aid in arranging the plans and keeping them in proper shape.

A statement of the work done on a general survey of the city is given in this report, also the street and sidewalk grades established.

The statement given below covers the expenses of this department for the season of 1893. The charge for instruments and office furniture, of \$1,067.51, is for the necessary outfit for carrying on the work of this department, and will not appear another year. The other charges are probably about the same as will occur from year to year, excepting the charge for

salaries, which will exceed the past season, as only nine months are covered in 1893.

The employees of this department during the season of 1893 were: Harley W. Morrill, assistant engineer; Frank W. Brown, rodman; Russell Burroughs, rodman; who have cheerfully attended to the duties entrusted to them.

PUBLIC LIBRARY.

REPORT OF THE TRUSTEES.

To the City Council:

The trustees of the Public Library present herewith the report of the librarian, which contains a full account of the work done by that institution during the past year.

It is with deep regret that we mention the death of our friend and colleague, Joseph T. Clough, who has faithfully served the public as a member of this board for twenty consecutive years. His interest in the welfare of the library always has been active, his counsel prudent, and his assistance helpful.

The day has passed when, in towns of this size, public libraries were considered mere conveniencies, or even luxuries, when money was spent upon them niggardly, when they were open to the public only on certain days, or but a short time each day, while the shelves contained few books of value, with a relatively large amount of inferior literature. To-day a well selected and voluminous library is a necessity in every intelligent community like this. Not merely does it furnish means of amusement for an idle hour, but it has an educational influence hardly second to that of the public schools. An examination of the librarian's report, and of the past history of this institution, will show that the generous appropriations heretofore made for its support have been wise and judicious, and we earnestly recommend the same liberality in the future.

Very respectfully,

CHARLES H. SANDERS,	WARD	1
JOHN E. FRYE,		2
PAUL R. HOLDEN,	4.6	3
WILLIAM L. FOSTER,		4
AMOS J. SHURTLEFF,		5
JAMES S. NORRIS,		6
WILLIAM W ELINT		-

LIBRARIAN'S REPORT.

To the Board of Trustees:

ADDITIONS TO THE LIBRARY.

Twelve hundred and seventy-eight books have been bought, and sixty-five have been received as donations for the use of the library during the past year.

Seventy pamphlets and maps have also been received as donations to the library.

Five hundred and twenty-four books have been discarded, many of them being imperfect, and most of them so badly worn as to be unfit for further use.

CIRCULATION OF BOOKS AND MAGAZINES.

Eighty thousand four hundred and eighty-seven books and magazines have been given out, the daily and weekly circulation being as follows:

From January 1 to June 30.

			Mon.	Tues.	Wed.	Thur.	Fri.	Sat.	Days. Total.

PENACOOK BRANCH.

Boxes of books have been sent to Penacook on Tuesday and Friday of each week, the number in each month being as follows:

January, .						770
February,						659
March, .						802
April, .						705
May, .						671
June, .						628
July, .						513
August, .						673
September,						695
October, .						748
November,						642
December,						707

CHANGES IN THE LIBRARY ROOM.

A large and convenient storage room, for the reception of congressional documents and other publications but seldom called for, has been fitted up in the basement, which has relieved the crowded shelves in the stack-room, and seems well fitted for the use to which it is put, being dry and warm, with conveniences for lighting each alcove. Desirable improvements have also been made in lighting the alcoves and delivery room.

THE REFERENCE ROOM

is frequently visited by many of our citizens, for the purpose of consulting the books, and it seems to be quite a help to the teachers and scholars in our schools in preparing their lessons.

Files of the current magazines are among the most valuable of the

reference books, and it is desirable that the collection should be increased as much as possible. In researches among the magazines, Poole's index is one of the greatest of time and labor saving machines.

THE READING ROOM

is also well patronized. Frequently every chair in the room is occupied by attentive readers of the newspapers and magazines to be found there.

REPAIRS NEEDED ON THE LIBRARY BUILDING.

The outside wood-work of the Library building needs a coating of paint badly, and it would not be amiss to make a thorough examination of the tin covering of the roof, and give it such repairs as may be necessary, preparatory to giving it another coating of paint. Forty years' exposure to the weather is very likely to start some leakage.

Respectfully submitted:

DANIEL F. SECOMB, Librarian.

January 1, 1894.

REPORT OF THE TREASURER.

To the City Council:

The balance in the hands of the treasurer, January 1, 1893, was \$100.11, to which has been added the city appropriations of \$6,500, and receipts from the library, \$54.01, making a total of \$6,654.12, as available funds for the purposes of the library. Of this sum, \$6,466.64 has been expended, as per itemized account in the expenses of the city, leaving a balance in the hands of the treasurer of \$487.18.

SANITARY DEPARTMENT.

REPORT OF THE BOARD OF HEALTH.

To the City Council:

The report of Charles E. Palmer, health officer, appended hereto, shows that the year for him has been a busy one. This board heartily, and without qualification, endorse his statement, therein contained, that he has "endeavored to discharge each and every duty promptly and energetically." The work of the health officer during the year, briefly summarized, has been as follows:

Nuisances found and orders for abatement issued,	697
House to house inspections,	512
Cases of contagions diseases reported to the health officer,	402
Connections of private sewers inspected and recorded,	135

While the above figures indicate that much has been done in the direction of improving the sanitary condition of the city and guarding the public against the dangers of contagion, they do not tell the whole story of Mr. Palmer's faithful and intelligent performance of his duties. One case in the summary may represent several hours of time and miles of travel, and especially is this true of cases of contagious diseases.

Each year makes more apparent the importance of this branch of the health officer's work. Upon the care which is given measures of quarantine and disinfection, the public largely depend for protection against the dangers and discomforts of epidemics. Mr. Palmer's attention and time, both day and night, have been given without stint to the large number of contagious cases which have been reported during the year, and this board feel, that in this portion of his work, as in all his

other duties, he has met the requirements of his position fearlessly, intelligently, and to the satisfaction of the public. In view of the constantly increasing work of the health officer, this board would recommend that his salary be made the same as that of a regular member of the police force.

SEWERS AND PLUMBING.

By direction of this board, the health officer has carried on thorough house to house inspections, as his other duties would permit. Such failures to comply with the ordinances as these inspections have disclosed, have received equal attention with complaints of similar violations. The larger portion of such instances of non-compliance with the ordinances pertain to connections with the sewerage system. Compliance has been insisted upon in all cases which have been brought to the attention of the board, and the same course will be pursued with respect to further inspections.

The board would renew, at this time, the recommendations of former reports, that all new plumbing work be subject to inspection and approval by a competent official, under the direction of this board. We have received during the year a sufficient number of complaints of defective plumbing to emphasize the need of more specific requirements than are at present contained in the laws of our city. We would recommend that before any portion of the drainage system of a public or private building be constructed, added to, or altered, the owner or agent file with the board of health, upon blanks to be supplied by the board, a notice of such work, and specification for the same, to be approved or rejected by the board; and, if approved, to be carried out under the direction of the board.

REMOVAL OF REFUSE, ETC.

The removal of refuse from the business portion of the city in the evening instead of on Saturday, is an appreciated improvement. In this connection, we would recommend that a requirement be made that swill, soap-grease, or any other offal carried through the streets, shall be transported only in tight barrels or boxes, which shall be covered.

THE MANUFACTURE OF WATER GAS.

In the latter part of November, residents of Wards 6 and 7 complained to the health officer of the presence in their homes of offensive gases, and he at once proceeded to investigate the It appeared that the refuse from the gas-works—where the manufacture of water gas, so called, had recently been substituted for that of coal gas-had been discharged into the public sewer, and that this had occasioned the nuisance of which complaint had been made. The gas company was at once notified to discontinue the use of the public sewer for that purpose, and promptly complied with the order by discharging the refuse into a private sewer connected with the works, since which time no further complaint has been made on this account. residing in the vicinity of the gas-works, however, have been troubled by offensive odors, and complaints being brought to the attention of the gas company, its manager appeared before the board, and stated that plans for the perfecting of its apparatus, when carried out, would largely obviate the trouble complained of. These plans have since been carried out, with marked improvement in the conditions with which the manufacture of the gas is attended. The board of health have been in correspondence with similar boards in other cities where water gas is in use, with a view to finding out if such manufacture caused any nuisance, and, if so, what steps, if any, had been necessary for the protection of the public. With one exception, the replies received have been that there had been no occasion for action by boards of health. The exception noted was Fall River, Mass., where trouble had arisen from the use of the public sewers, as here.

CONTAGIOUS DISEASES.

When we call to mind the sad sequelæ and numberless deaths due to carelessness or inefficiency in the management of contagious diseases, and realize how many precious lives have been spared since the dawning of the era of sanitary science, we may well say our responsibility is great beyond measure. The true physician of to-day is more engaged in studying how to prevent sickness than how to cure it, and is devoting much thought to the ever-present, death-bearing germs surrounding us on all sides.

The day has passed when the unthinking mother, through ignorance, wilfully exposed her nursing babe to searlet-fever, just because "the disease was running light, and as the child must have it sometime, he had better have it now and be over with it." Education has taught that mother that her child need not have contagious diseases—they are not a necessary part of a child's existence; she now knows if he is securely kept away from the living germ, he cannot have the disease. These afflictions do not arise de novo—spontaneous generation has long since been disproved. The hidden germ may not be traced, but it is there; there may not have been the slightest cause for suspicion, but the wall-paper of the unfumigated and undisinfected chamber would explain all.

DIPHTHERIA.

Its very name strikes terror to the heart of the watchful mother, ever solicitons for the welfare of her children, and well it may, for too often is its wake strewn with death and desolation. At times, do what we will in the line of medical and surgical treatment, our best efforts are without avail. If there were no diphtheria! And yet it is possible; but by sanitary methods alone. To think, to know that all the suffering, blindness, cripplings,—ave, deaths, from this and other contagious diseases could have been averted! Fortunately, our city has not been as much afflicted as some others, but we cannot foresee what next year may bring forth. Last year we had forty-five cases with seven deaths,—less than the average rate of mortality. There were two prominent outbreaks; one at the vicinity of Fosterville, the other on South Spring street. The former was confined to three families with 6 deaths; the latter occurred in a boardinghouse of 14 members, 11 of whom contracted the disease, with no deaths. These cases were closely watched, a rigid quarantine maintained, and were kept confined to the original ontbreak. Our labors were heartily seconded by other officials, to whom we express our kind appreciation.

SCARLET-FEVER.

During the year there were reported to us forty-one cases, and we are pleased to say all recovered. There was no special

epidemic until December, when eleven cases appeared within a few days. Suspicions strongly pointed to the milk consumed in these families, but no positive tracings were obtainable.

MEASLES.

It is something new to our citizens to have their houses placarded for this disease, but why should we not do all in our power to localize the deplorable results of this ruinous malady? We have had the most prevalent epidemic the past year we have had for many years. It being the first attempt on our part to control what is generally regarded as a harmless thing, we did not succeed as well as we shall when called upon to handle it again. We ask to have those who do not employ a physician compelled to report all cases in their families. Only by so doing can we ever hope to restrict the disease. No deaths followed, but we cannot say that many have not had their constitutions undermined by it.

TYPHOID FEVER.

We have not had any epidemic, nor any particularly malignant cases. It seems as if those on the east side of the river were undoubtedly due to the very poor quality of well-water with which they are supplied. Several examinations have shown the water to be unfit for drinking purposes. Thirteen cases were reported for the year; of these, two died.

MILK-SUPPLY.

All know the great affinity of milk for germs, and the consequent widespread avenue for the propagation of disease. The water with which the cans are washed or the milk diluted, the walls of the house or dairy, the hands of those who do the milking, the condition of the teats and udder,—any or all may be the starting-point of a death-dealing agent, which finds its victims in those who drink the milk. Many a case of scarlet-fever and many a death has been due to the criminal negligence of milk dealers, who, through ignorance, carelessness, or stinginess, did not employ a physician when their children had sore throats. Daily some cry goes up about our water-supply, and all citizens demand extreme and unusual precautions for its wholesomeness.

But how about our milk? Is it any less important to have this necessary fluid surrounded by some ordinary safeguards? Why should not dealers in milk to our people be licensed, their places regulated by the board of health, and they compelled to report at once every case of sickness occurring in their household? Is it asking too much?

THE PUBLIC SCHOOLS.

For the protection of our children, we submit for your approval the following regulations pertaining to the introduction of contagious and infectious diseases into schools:

- 1. A pupil shall not be admitted to any public school without a certificate from the board of health that such pupil bears physical evidence of having had vaccinia.
- 2. For the return of any pupil to school, after suffering from small-pox, scarlet-fever, diphtheria, measles, or whooping cough, a certificate shall be required from the board of health, that such pupil has lost all power to communicate to others the disease from which he has been suffering, and that all infected articles of his household have been disinfected to the satisfaction of the board of health
- 3. For the continuance in school of any pupil in whose family or close proximity there is a case of small-pox, scarlet-fever, diphtheria, measles, or whooping cough, or any undestroyed infection from said diseases, there shall be required a certificate from the board of health, stating that he is safely removed from the danger of contracting and conveying the disease.
- 4. When a child is known to have been exposed to the infection of small-pox, scarlet-fever, diphtheria, measles, or whooping cough, he shall return to school only on the certificate of the board of health, that the period of incubation belonging to the disease to which he has been exposed, has passed.

CONCLUSIONS.

With a full knowledge of the false security afforded our community through a process of fumigation, disinfection, and isolation, lacking in any one of its essential qualities, we intend, with your approbation, to personally supervise the disinfection of the patient, in conjunction with our usual supervision of isolation and fumigation.

Until recently fumigation was in many instances left to the care of the family,—we now do all of it. Disinfection of the person has, or has not, been done as the judgment or caprice of

6

the family dictated. We feel assured we can make arrangements whereby this very necessary and all-important measure can be thoroughly carried out without much expense. We desire to have measles quarantined for two weeks at least, diphtheria for three weeks, and searlet-fever for forty days. In our opinion, whooping cough should be isolated by the same means as other contagious diseases. Why this disease, which annually kills so many, should run mad in its rioting, we cannot conceive. Last year we had four deaths due to it directly, and no doubt others indirectly, under the head of broncho-pneumonia and bronchitis.

The statute relating to compulsory vaccination of school children should be strictly enforced. We are aware that we are taking advanced ground, and know the hearty and undivided cooperation of your honorable board, physicians, school-board, and citizens in general, is necessary to attain our ends. No half measures will ever stamp out contagion. We shrink in horror at an imaginary Asiatic cholera, but think lightly of a disease that is every year causing death in our midst.

We feel the urgent and immediate need of a well-appointed place wherein contagious diseases may be treated; the pest house is no such place, and the Margaret Pillsbury General Hospital will not take such cases. Cholera, small-poy. diphtheria, scarlet-fever, measles, whooping cough, and mumps, ask why they are not entitled to as much care and consideration as dyspepsia and jaundice. They are certainly more dangerous, and require more intelligent and constant attention from trained They occur most frequently in such places as to preclude the probability of ordinary care, feeding, and nursing at home, or the surety of isolation. Without some specially adapted hospital for their treatment, these diseases must spread. may become epidemic, none of our children will be safe, and our death-rate will be increased. We respectfully renew to your honorable board our recommendations of 1891 relating to this question.

E. A. CLARK,D. E. SULLIVAN,E. N. PEARSON,Board of Health.

REPORT OF THE HEALTH OFFICER.

To the Board of Health:

Gentlemen: As required by the city ordinance, I present herewith my report as health officer, for the year ending December 31, 1893.

The general sanitary condition of our city at the present time is good, and the work accomplished the past year will compare favorably with those preceding. This department has endeavored to discharge each and every duty promptly and energetically, but oftentimes obstacles have arisen which necessitated the adoption of temporary expedients.

The following tables will show the extent and nature of the work performed, together with the results. Six hundred and ninety-eight nuisances were found, and orders were issued for their abatement. These are classified as follows, viz.:

Accumulation of	decaye	d fi	nit :	ind i	regeta	ble	
matter, .							12
Accumulation of ti	n cans :	and o	oal a	shes,			17
Bad well water, .							3
Bad sink drainage,							34
Broken sewer traps	3, .						2
Catch-basins, not t	rapped						6
Dead animals, .							40
Decayed meat and	fish,						2
Defect in house sev	wers.						2
Dumping rubbish,							6
Damp cellars, .							34
Dropping manure i	n street	., .					2
Defective plumbing	ŗ						27
Filthy stables, .							19
Filling old well,							1

Filthy cellars,				. 23.

Water-closets not ventilated				. 11
Water-closets foul and offen				. 7
Water-closets out of repair,				. 8
m 1				
Total				698

The foregoing complaints were carefully investigated, and in a majority of cases the orders issued by the sanitary officer were complied with; but when a disposition to evade them was manifested, a second notice followed, accompanied with a copy of the statutes and ordinances relating to the public

health. This was usually sufficient to secure prompt compliance with the laws.

HOUSE INSPECTION.

In no branch of the service can the progress of sanitary work be more satisfactorily shown, than by the abatement of nuisances and inspection of buildings.

In accordance with a vote passed at your meeting holden in April, I immediately commenced a thorough house inspection, making a complete record of the condition of yards, stables and out-buildings, privy-vaults, cesspools, water-supply, plumbing, drainage, water-closets, ventilation, cellars, number of tenants in buildings, and general condition of the premises. This work was continued until June, at which time measles appeared among us and spread with great rapidity. The time required to placard houses, attend to sewer inspections, and general complaints, compelled me to discontinue further work in that important branch of the department. As soon as possible I intend to resume my duties in that line, and hope I may be able to continue therein till every house and building has been thoroughly inspected.

A list of these inspections is given below:

Private dwellings,				147
Tenements, .				258
Boarding-houses,				7
Stables,				48
Meat markets, .				G
Stores,				19
Churches,				2
Hotels,				1
Manufactories, .				8
School-houses, .				1.4
Slaughter-houses,				2
Total, .				512

In making these inspections, it has been customary to give verbal notice to abate nuisances, and if this did not secure compliance, to serve, in accordance with the law, a written one, ordering the abatement of the same within a given number of days. As a tribute to the good sense and public spirit of our citizens, the written notices are commonly respected, and but seldom does the ultimate necessity arise for carrying nuisance cases into court, although in some instances it has been found necessary to make a second, and even three or more visits, to determine whether the request has been complied with.

Six hundred and ninety-eight notices for abatement of nuisances were served. In 274 cases, vaults and old privies have been removed, and water-closets substituted, as compared with 146 last year. Seventy-five additional ones were placed in houses built during the year, 40 taking the place of old ones removed, making a total of 389.

In all cases, so far as known, ventilation has been supplied by soil-pipe carried to a point above the roof of the buildings, as required by the provisions of chapter 22, section 12, ordinances of the city of Concord.

CONTAGIOUS DISEASES.

From the fact that our city is in constant communication with other cities, together with our increase of population, we may naturally infer that we have reached that point in our history when we shall no longer be absolutely free from such diseases for any great length of time. While this is true in a general sense, yet by prompt and efficient methods we can reduce our number of cases to a minimum, and be free from any epidemic. The placarding of houses and tenements has been continued, and we know that very many people have been kept away from the infected houses, who might otherwise have been ignorant or negligent.

The various cases have been reported to this office by months, as follows:

	Jan.	Feb.	Mar.	Apr.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Total.

Tota	1, 41	13	$\frac{-}{3}$	$\frac{-}{45}$	300	$\frac{-}{402}$

SCARLET-FEVER.

It will be seen by the above table that 41 cases have been reported, none proving fatal, as compared with 37 cases in 1892, with a fatality of 3. While many cases have been light, and in some instances scarcely recognizable, the same rules have been applied as in those of a more virulent type, and they have readily yielded to treatment. In a large number of cases, the origin of the disease has been traceable to out-of-town parties coming into our midst.

DIPHTHERIA.

In the early part of the year this disease made its appearance in various parts of the city, but prompt and efficient measures were taken to keep the malady from spreading, and by so doing it gained no foothold where it could maintain itself. While in many instances it is impossible to ascertain the primary cause of the disease; yet if the premises are filthy, no traps in the drainpipes, and no ventilation for sewer gases, we may reasonably expect a development of the disease, making it necessary to place the premises in good sanitary condition. Of the 45 cases reported, 7 proved fatal.

MEMBRANOUS CROUP.

Three cases have been reported to this office, all of which proved fatal. The wisdom of treating this disease in the same manner as true, undisputed diphtheria, cannot be denied.

MEASLES.

The prevalence of this disease during the year has been much larger than formerly, 300 cases having been reported; none, however, proving fatal. The record will undoubtedly prove defective, as far as getting at the actual number of cases, owing to the fact that many of our citizens do not employ a physician, and are consequently not reported. Here, also, isolation has its effect, and little or no hardship is caused thereby. The disinfection of the premises in these cases is left entirely with the householder.

TYPHOID FEVER.

Although a larger number of cases have been reported than last year, still the disease has not prevailed to an unusual degree. Every house has been inspected, with a view to discovering and removing the real cause. Of the 13 cases reported, but 2 proved fatal. The same method of isolation and disinfection has been employed as in scarlet-fever and diphtheria.

DISINFECTION.

The same method of disinfection has been continued as in former years. Science has not yet developed any more effective, and at the same time economical, system, than that of sulphur fumigation. While isolation of the patients should receive a due amount of credit for the restriction of contagious diseases, thorough disinfection by sulphur should be considered an important adjunct, the recurrence of the disease after a thorough fumigation having rarely been known.

Weekly statements have been forwarded to the secretary of the state board of health, giving the number of contagious diseases reported, fatality, number of infected houses, together with what action was taken in each case by the health officer.

GLANDERS.

Seven cases of this disease have been reported by the veterinarian in charge. The animals were immediately killed and buried, stables carefully disinfected, and no further cases have been known.

SEWER CONNECTIONS.

The health officer has endeavored to perform his duty in regard to the enforcement of rules and regulations relating to sewers and drains, and in each instance, as far as known, he has been notified in season to see the connections made and work completed. Of the 135 private sewer connections, a complete record has been filed, giving date, location of inlet, location of traps, size and kind of pipe used, rate of fall per foot, total length of pipes, and name of licensed drain-layer doing the work. Akron and east-iron pipe has been used in all instances, and a statement of the various sizes follows:

10-inch Akron pipe, 30 feet.
6-inch "" 1,545 feet.
5-inch "" 6.212 feet.
4-inch "" 90 feet.
5-inch iron pipe, 320 feet.
4-inch iron pipe, 60 feet,

making a total of 8,257 feet, or an average of about 62 feet for each lateral sewer.

This amount of drainage has been furnished for

82 private dwellings,

97 tenement houses,

3 public institutions,

2 churches,

6 business blocks,

2 boarding-houses,

2 stables.

During the year there have been abandoned and discontinued, by order of the board,

61 cesspools,

51 surface drains,

5 old stone drains,

2 drains discharging into old wells,

and five sewers relaid with larger pipe, for the purpose of connecting water-closets.

SEWERAGE SYSTEM.

Additions to this system have been extended to various sections of the city, as will be shown by report of city engineer, and an unusually large number have availed themselves of connecting therewith, showing very conclusively that they are fully appreciated.

PLUMBING.

A feature in this branch of the sanitary service, which year by year becomes more and more prominent, is the demand which must continually present itself, owing to increase of population, for the service in this department of a professional plumbing inspector. This office is often in receipt of complaints concerning defective plumbing. These calls have been promply attended to, and frequently peppermint tests made, with good results. Few nuisances are more actively dangerous than those arising from imperfection in plumbing. I earnestly commend to your consideration the wisdom of having a competent inspector of plumbing, and the enactment of an ordinance similar to those in force in many other cities.

Monthly statements have been prepared from the returns made to the city registrar, giving information as to the number and causes of death, death-rate per thousand, locality, sex, color, condition, age, place of burial; also number of marriages and births.

Records of births by months will prove defective, as far as actual numbers are concerned, from the fact that some of our physicians neglect to make returns, as required by law.

These statistics have been furnished the daily papers, and sent in exchange to the following cities:

Atlanta, Ga.
Anburn, N. Y.
Aurora, Ill.
Angusta, Maine.

ACKNOWLEDGMENTS.

It affords me great pleasure to acknowledge the support given this department, and the many courtesies shown during the year, by his honor the mayor, members of the city council, and all others who have aided in making the labor in this department as agreeable and pleasant as possible.

Respectfully submitted:

CHARLES E. PALMER, Health Officer.

Mortality Report for the Year ending December 31, 1893.

The organization of the police department at the present time is as follows:

G. Scott Locke, city marshal.

James E. Rand, captain.

Daniel S. Flanders, regular police and night watchman.

John E. Baker,

Fred M. Eaton, regular police and i	niơht.	watchman.
-------------------------------------	--------	-----------

Levi F. Cole,	6.6	66
Horace Robinson,		6.6
Whitney D. Barrett,		66
Charles P. Webster,		
James Kelley,		
Charles E. Kelley,		6.6

The special reserve officers, consisting of fifteen men under Captain C. L. Gilmore, have rendered valuable assistance to this department.

I will renew my recommendation of 1891, as follows:

I would most respectfully suggest that this department requires a team. Frequently we are called to some part of the city to make an arrest, but before we can procure a team and arrive at our destination the party has escaped, and that old question is asked, "Where are the police?" What would the public think, or say, if the fire department were obliged to go to livery stables to hire horses in case of an alarm of fire? It is just as essential that the police should respond at once to all calls.

I would most respectfully eall your attention to the fact that this department is subject to ealls from any part of the city to respond to all alarms of fire, which always requires a team. I would suggest that a shed suitable for one horse, one wagon, and the city ambulance should be added to the police station.

I would also recommend a police signal line, extending from West street to Penacook, with signal boxes at convenient points. It would be of great service in case of fire at West Concord and Penacook, and would do away with the demand for an increase in the police force.

By referring to the detailed report of arrests, you will find there have been but few crimes of a serious nature committed in our city during the past year. Two cases of murder, and two of assault with intent to kill and murder, appear in this report, but the crimes were committed outside of Concord.

POLICE FORCE.

For the success attained by this department, sincere thanks are due all the officers for their hearty cooperation in my efforts to secure criminals.

DISCIPLINE.

The board of police commissioners have issued a book of rules, which have proved valuable to the force, and I take great pleasure in saying that Concord has a well disciplined police force.

IN CONCLUSION,

I wish to return my sincere thanks to the board of police commissioners, to His Honor Mayor Cogswell, and the board of aldermen, for the courteons treatment this department has received at their hands. Harry G. Sargent, city solicitor, has always advised and aided us, for which our thanks are due him.

Respectfully submitted:

G. SCOTT LOCKE,

City Marshal.

GEORGE M. FLETCHER,

Clerk of Police Court.

Concord. Dec. 30, 1893.

REPORT OF THE CITY SOLICITOR.

To the City Council:

There are less suits pending against the city at the present time than for many years past. This is, no doubt, owing, to some extent, to the repeal of the law allowing damages to travellers in the use of highways.

Although the city of Concord has been singularly fortunate, as compared with other cities and towns in the state, in regard to the amount paid to persons suffering injuries while travelling on the highways, yet, until the repeal of the highway law, there was hardly a term of court in this county in which there were not several cases against the city for damages occasioned by injuries happening in the use of its highways. The only case against the city, under the old highway law, that is pending at present, is one in favor of Ann Currier, for one thousand dollars, which was referred to in my last report. At the last October term, I filed a special plea, alleging that the notice served on the city was insufficient. A partial hearing has been had on this plea, which, if sustained, will put an end to the case without a trial before the jury. If the plea is not sustained, the case will be in order for trial by the jury at the next April term.

The only case referred to in my last report that now remains undisposed of, is the case of Scully c. Concord. In this case the Concord Street Railway are the real defendants, and the city is only nominally interested therein. It will probably be tried at the next April term.

Higgins v. Concord, referred to in my last report, has been settled by the payment of \$150, in full, to the plaintiff. This settlement was made by me, by the direction of the committee on sewers, who made a personal examination of the premises on which the alleged damages were suffered, and who were satisfied that the plaintiff was entitled to that amount.

Gustavus Walker v. Concord was settled by the payment to him

of the amount originally awarded by the board of mayor and aldermen.

The suit of Edgar Hunt r. Concord, to recover ten thousand dollars for personal injuries happening on the highway, has been disposed of by the payment of plaintiff's counsel fees, amounting to \$50, and judgment has been entered in favor of the city.

The case of Charles R. Burnham v. Concord was settled by the payment of the plaintiff's counsel fees, amounting to \$300. In this suit the amount of damages claimed was ten thousand dollars, and the case had once been tried by jury. The trial resulted in the disagreement of the jury; it being equally divided between the plaintiff and the defendant.

The only cases now pending against the city, besides the ones already referred to, are Albin & Martin v. Concord, and the Tahanto Real Estate Association v. Concord. These cases are appeals from the awards of the board of mayor and aldermen of damages caused by cutting down the grade of a highway. The amount claimed in each case is about twice the amount awarded. A committee has been appointed by the city government to confer with the claimants in these suits, but no result has yet been reached.

Although the number of suits against the city has decreased during the past year, yet the time of the solicitor has been occupied by city business more than for several years past. This arises from the fact that the various departments of the city to which it is his duty to give advice, have required more assistance than usual. Among the duties which the solicitor is required to perform is the drawing of ordinances for the members of the city council, when requested, drawing the contracts made by the city, advice to the mayor, members of the city council, the city clerk, the police department, the board of water commissioners, the board of assessors, tax collector, cemetery committee, and the commissioner of highways. During each month some of these officials, and occasionally all of them, request and receive advice on legal matters from the solicitor. My official relations with all these departments have been pleasant and agreeable, and I trust that the aforesaid services rendered by me have been acceptable to the city council.

HARRY G. SARGENT,

City Solicitor.

\$4,437.36

REPORT OF CITY LIQUOR AGENT.

To the City Council:

In compliance with section 10, chapter 112, of the Public Statutes of this state, and the resolution of the board of mayor and aldermen of May 26, 1888, establishing this agency, 1 respectfully report the transactions of this office for the year 1893.

PUBLIC PARKS.

REPORT OF THE PARK COMMISSIONERS.

To the City Council:

The fifth annual report of the park commissioners for the year 1893 is respectfully submitted:

W. H. Richardson was selected for the superintendent, and began work early in April. By his experience and work he has accomplished much during the year. Six men were kept at work during the greater part of the season, with team as needed. A large amount of grade has been put upon the grounds, which, together with the loam and dressing needed to bring about the best results, caused a larger expenditure than before. This was done by contract, and we think the money was well expended. The lowlands still uncovered will necessitate more grade, as the work progresses from year to year.

The appearance of the grounds has improved during the season, but need of water to keep the grass-ground in good condition during the dry season was experienced. In order to meet this want, pipes were laid so that with hose all the grass-ground now completed can be reached. The supply was from the so called "White spring," used by the water-works until recently. We hope to improve this supply the coming season.

In the case of new work, much time and material must be spent in ways which do not at once seem of consequence. Upon investigation, it will be seen that much of the soil we have is of such a nature as to be almost entirely useless unless combined and enriched by other materials. We have also so much low and wet land that drains and sub-drains are necessary. During the year blind drains have been constructed in the most approved manner, and the results are already apparent. The trees have been thinned out on the flat adjacent to the large pond, and the ground covered with six to eight inches of gravel.

A border of shrubbery has been planted along the Washington street line of the park, which will reveal a very attractive

feature as it matures. The walks have been kept in better condition than before, and also extended. Perhaps one of the most noticeable improvements has been made at the entrance of Washington and White streets. No attempt has been made to perfect plans for entrances, or to build a much-needed bridge over the outlet of the pond, both of which we hope the appropriations will allow us to carry out in the near future.

We are glad to note a growing sentiment among the frequenters at the park, in regard to the use of it as a beautiful place of recreation. Lawlessness is gradually abating, and people are coming to realize the worth of this spot and considerate of the time and care expended upon it. It is, however, necessary that police supervision be given at intervals, and the city marshal has readily and kindly cooperated in the maintenance of order.

In the early summer Mrs. Dr. Mary B. G. Eddy presented the park with a pair of beautiful swans, and they proved a great attraction and source of much interest to all who frequented the grounds.

The money appropriated for the purchase of land adjoining the park, in March, 1891, has become available, and the land deeded to the city.

The commissioners have arranged with James H. Rowell, and purchased the land now occupied by him, which they will hold until such time as an appropriation is made to accept it. The wisdom of this will be apparent, when it is realized that the land is now owned or controlled so that the entire territory of the park is bounded by streets.

Concord is far behind most cities of her size in the care and thought given to her parks and commons, but we hope to see before long that a movement in a forward direction will be made.

PARSONS B. COGSWELL, ex-officio, BENJAMIN S. ROLFE, JOHN F. JONES, GEORGE A. YOUNG, WILLIAM P. FISKE, BENJAMIN C. WHITE, WILLIS G. C. KIMBALL,

Park Commissioners.

Respectfully submitted:

W. P. FISKE, Treasurer.

CEMETERY DEPARTMENT.

REPORT OF SECRETARY OF COMMISSIONERS.

To the City Council:

We hereby submit to your honorable body the third annual report of the Board of Commissioners of Cemeteries.

The work during the past year has been carried on along the same lines of improvement as were marked out at the organization of this board.

To meet the increasing demand, we have prepared a new block in the northerly section of Blossom Hill cemetery, and already quite a number of lots have been taken. This new block is in as desirable a location as any in the cemetery. We have also laid out, and shall prepare during the coming year, a large block, wherein will be buried those unable to own a lot.

The main entrance has been completed, and presents not only a substantial, but pleasing, appearance. Still further improvements are contemplated in the way of beautifying the frontage of Blossom Hill cemetery.

Your appropriation for the benefit of the Old North cemetery has been expended in grading, widening the main avenues, and general care and improvement of the grounds.

The work of extending the wall in front of Calvary cemetery has been carried along during the year, and only a small appropriation will be required to complete it.

At the beginning of the year Edward A. Moulton was elected superintendent of cemeteries, and the board have found him to be the right man for the position.

We have conducted the work of the year in as economical a manner as possible, considering the increasing demands for improvement, the imperative necessity for additional lots, and the constantly increasing expense resulting from the enlargement of the cemetery. We trust these expenditures will meet the approval of your honorable body.

GEORGE O. DICKERMAN,

Secretary of Cemetery Commissioners.

REPORT OF TREASURER OF COMMISSIONERS.

To the City Council:

The treasurer submits the following report of receipts and expenditures by the Cemetery Commissioners for the year ending December 31, 1893:

BLOSSOM HILL CEMETERY.

FIRE DEPARTMENT.

REPORT OF THE CHIEF ENGINEER.

To His Honor the Mayor, and Gentlemen of the City Council:

I have the honor of submitting the annual report of the fire department for the year 1893.

This year we have had fires in two places, Union steam mill and Phenix hall, that caused heavy loss, but, when compared with the property endangered, the loss was small.

In my report of 1892, I suggested that telephones be placed in each hose house, and in the chief's residence; also the purchase of the land east of the Alert house, to make room for apparatus that is crowded in the central fire station. I still believe it should be done.

The fire service in Wards 1, 2, and 3 is not what it should be, and cannot, under the existing regulations, be brought up to a standard that the city demands. I suggest the following changes:

For Ward 1, reduce the steamer company to fourteen men, and purchase a light ladder truck, with ladders, and place it in charge of a company of twelve men. This will not cause any extra expense, and will greatly strengthen the department in that ward.

In Ward 2, place in service a light chemical engine, and reduce the company to ten men, who are located, night and day, near the station. This could be done at a saving in the expense account of the department.

Ward 3 would be better served by reducing the company to twelve men, and substituting for the old reel now in use a light hand hose wagon. Much better service would thus be secured, and the running expenses would be so reduced that the saving would soon pay for the new apparatus.

The apparent deficiency in the finances of this department is

cansed by purchases authorized by the city council, for which no appropriation was made, it being understood that any deficiency occurring would be met at the end of the year by a special appropriation. The repairs of the steamer Kearsarge, amounting to \$1,450, the purchase of hose to \$800, and other items that might be placed before you, show the extraordinary expense.

During the year the Kearsarge steamer has been rebuilt by the Manchester Locomotive Works. A new boiler was put in, all the wearing parts refitted, pumps reseated, and new pipe and connections put in wherever needed, thus making it practically a new engine.

The precinct department has responded to twenty-five box alarms, and forty still alarms, as follows:

BELL ALARMS.

Box 25. January 8, 8:51 p. m. Chimney fire in residence of Mrs. Mary F. Drew, Park street. No damage.

Box 24. February 22, 10:48 a.m. Slight fire in American House. Cause, defective chimney.

	Value.	Loss.	Ins.	Ins. paid.
C. E. Otis, building,	\$4,000	875	\$3,000	\$75
H. J. Lowell, contents,	2,000	30	1,500	30
Total,	\$6,000	\$105	\$4,500	\$ 105

Box 24. February 27, 9:24 p. m. Fire in building on Bridge street, owned by the Shoe Factory association, and occupied by Howard L. Porter. Cause, chimney.

	Value.	Loss.	Ins.	Ins. paid.
Shoe Factory Asso., building,	\$28,000	\$300	\$10,000	\$300

Total,	\$60,000	\$500	\$42,000	\$500

Box 5. March 4, 2:22 p. m. Fire in roof of Concord & Montreal paint shop. Cause, sparks from a locomotive. Loss, slight.

Box 45. April 19, 2:04 p. m. Fire in grass in yard near Catholic church, which threatened that structure. No damage.

Box 23. April 20, 6:57 p. m. Followed by second alarm and special call for relief steamer. Fire in Union Steam mill, owned and occupied by Mead, Mason & Co., and others, which was com-

pletely destroyed. This was one of the fiercest fires which the department has been called upon to contest against in years, and it was only by the most determined effort of every man in the department, assisted by the weather conditions that prevailed, that Concord was saved a most disastrons conflagration. At one stage of the fight, so imminent was the danger of the flames spreading, that a call was sent to Penacook for assistance. The steamer from that place came as far as West Concord, where orders were received to turn back, as the fire was then under control. The main mill was occupied, the first and second floors, by Mead, Mason & Co., and the third by John H. Sanborn, contractor and builder. The old churn factory was occupied by Flanders Bros., sash and blinds; Daniel Parker, carpet cleaner: John Mead, wood turner. The old organ factory building was occupied by F. W. Scott & Co., while in the rear was the old grist mill and the granite polishing works of Tresidder, Phillips & Mudge. All but the old organ factory were either destroyed wholly or in part. The fire started in the boiler room.

	Value.	Loss.	Ins.	Ins. paid.

November 20, 5 p. m. Chimney fire in residence of John Stickney, on Prince street.

November 25, 11:30 a.m. Chimney fire in William I. Leighton's house, corner Green street and Ford's avenue.

November 26, 11:40 a. m. Chimney fire in Geo. A. Ordway's house, on Thorndike street.

November 30, 5:15 p. m. Chimney fire in L. R. Fellows's block, on Spring street.

December 8, 8:45 p. m. Chimney fire in residence of William J. Blakely, on South State street.

December 17, 4:40 p. m. Fire in Concord & Montreal freight station. Loss, \$10.

December 19, 2:50 p. m. Stable on Warren street, owned by Y. M. C. A., and occupied by J. O. Raymond.

December 25, 8:30 p. m. Chimney fire in residence of C. E. Lewis, on Chapel street.

December 25, 8:45 p. m. Chimney fire in residence of C. W. Sargent, on Warren street.

In addition, two still alarms, of which no record was kept, were responded to by members of the Good Will hose company.

Fires occurring in and about Penacook during the year were as follows:

February 15, 10:40 a.m. House of George S. Morrill, on Merrimack street, occupied by J. I. Hoyt. Cause, defective chimney. Loss, \$15. Insurance paid, \$15.

March 5, 9 a. m. Fire in closet of house owned by Oliver J. Fifield, on Washington street, occupied by Farwell P. Holden. Cause, matches in clothing thrown over a steam radiator. Loss on building, \$6.53; insurance, \$6.53. Loss on contents, \$75; insurance paid, \$75. No alarm.

April 20, 7:50 p. m. Call for assistance from Concord. Fire in Union steam mill.

May 22, 11:40 a.m. Brush fire on land of Oliver J. Fifield. No loss.

June 29, 12 m. Fire in roof of railroad bridge on Boscawen side.

November 30, 8 p. m. Chimney fire in the residence of Isaac K. Gage, on the Boscawen side. No damage.

December 3, 4:30 a. m. Dwelling house of Patrick Ahern, near Farnum's mills, in East Concord. Cause, defective chimney. Loss, \$500. No alarm.

No fires occurred in Wards 2 and 3 this year.

HYDRANTS.

The high service has been completed this year, and used to great advantage in the fire service. There are 36 hydrants in the high service, designated by being painted black with white tops. On the low service there are 226 hydrants, painted red, and 27 private hydrants.

APPARATUS AND FORCE.

The force of the department is as follows: Precinct, located at the Central fire station, one first-class Amoskeag engine, "Eagle," with Eagle Hose Company (15 men); two second-class Amoskeag engines, "Kearsarge," with Kearsarge Hose Company (16 men); "Gov. Hill," relief steamer, in charge of an engineer and fireman belonging to Kearsarge Company; the Hook and Ladder Company, "City of Concord" (20 men). There are nine horses, owned by the department, kept at this station.

The Alert Hose Company (13 men), located on Washington street, has a modern hose wagon, and has a horse at the house at all hours, owned by the city.

The Good Will Hose Company (13 men), located on the corner of Concord and State streets, has a modern hose wagon, and has a horse at the house at all hours, owned by the city.

All the members, excepting steward, assistant steward, and three drivers at the central fire station, are call men.

The Precinct companies have swing harnesses on all apparatus.

The "Pioneer" steamer, at Penacook (28 men), is a fourth-class Silsby, with second-class Amoskeag reel (4 wheels). The steamer can be drawn by hand or horses, as necessity requires.

The Cataract Company (30 men), at West Concord, has a Hunneman 6-inch cylinder hand-engine, and a second-class 4-wheel reel, Amoskeag make, drawn by one horse, and provided with swing harness.

Old Fort, at East Concord (30 men), has a 5-inch cylinder Hunneman hand-engine.

REGULATIONS OF THE CONCORD PRECINCT FIRE DEPARTMENT.

ADOPTED BY THE BOARD OF ENGINEERS, AUGUST, 1888.

ARTICLE 1. Any engine or hose company running out a line of hose from a hydrant or steamer shall be entitled to the pipe, although the hose of other companies may be attached in order to reach the fire; and any company coming to a fire, and finding an incomplete line of hose laid out from a hydrant or steamer, shall attach to and lengthen out such line in lieu of laving a line of its own.

- ART. 2. When two or more engine or hose companies are playing in a continuous line, the pipe shall belong to the company attaching to the hydrant or steamer, as provided in the foregoing article; but any company furnishing the *entire* line, and receiving water from a steamer, the pipe shall belong to such company so receiving.
- ART. 3. Each engine and hose company shall have equal claim to the hydrants; but it is enjoined upon the engine companies to draught their own water from a reservoir, whenever a suitable one can be found within a reasonable distance.
- ART. 4. No company shall take possession of a hydrant or reservoir, unless their hose and apparatus for attaching to the same are at hand and ready for use. The company which shall be thus ready shall be entitled to such hydrant or reservoir; but, upon the order of an engineer, another company may attach a second line of hose from such hydrant or steamer, in case the same may be necessary, such company having first laid its hose, and being ready to attach the same.
- ART. 5. No engineer shall interfere with, or attempt to give orders relative to the location, or use of, a line of hose when he has ascertained that another has command of it, unless by consent of the engineer in charge of it, or by orders of the officer in command at the fire; and it shall be his duty to inquire whether there is an officer in charge.
- ART. 6. In proceeding to, working at, or returning from, fires, noisy demonstrations are strictly prohibited, and it is required of officers of companies to maintain perfect order and decorum in their respective commands during all such service.

- ART. 7. No company, while returning from a fire, will be allowed to proceed faster than a walk, and it must at all times keep on the right of the street. Drivers are strictly enjoined, in proceeding to a fire, to use the utmost care and cantion consistent with promptness. Racing between companies is forbidden under any circumstances. Any collision or casualty occurring to horses or apparatus will be considered a sufficient cause for the suspension of the driver in charge at the time.
- ART. 8. No member of any company shall leave the city without first informing his foreman; no foreman, or assistant engineer, without first notifying the chief engineer,—in each case the party so leaving providing a substitute.
- ART. 9. In ease of fire, the foreman first arriving shall be in command until the arrival of an engineer.
- ART. 10. Any order issued by the chief, or an assistant, engineer shall be promptly obeyed.

RULES FOR DRIVERS.

The drivers shall be required to occupy sleeping apartments in the central station, each being allowed two nights off each week, from 9 o'clock p. m. to 6 o'clock a. m., upon particular nights to be designated by the steward.

They shall be at or near the station at all times, except when employed by the superintendent of streets, or absent by permission of the steward or an engineer, and shall perform such duties as the steward or chief engineer may direct.

They shall groom and take proper and trusty care of their horses; shall keep the stables clean, and the harnesses and all things pertaining to their department in order; shall have the horses harnessed as directed, and not leave the station without everything in readiness for immediate service; shall exercise their horses when required by the steward or chief engineer, and practise care and economy in feeding and general management.

In proceeding to Main street, via Warren street, the drivers shall trot their horses, and have them under complete control until the turn has been made.

In case of fire, the drivers shall be subject to the orders of any engineer.

FIRE-ALARM TELEGRAPH.

NUMBER AND LOCATION OF FIRE-ALARM BOXES.

For the purpose of uniformity in numbering the fire-alarm boxes, the city is divided into five districts, viz.:

DISTRICT 1 Embraces that section of the city north and west of Washington street, box 17 of this division being located on the *south* side of the street.

DISTRICT 2. Embraces all between School and Washington streets.

DISTRICT 3. Embraces all between Pleasant and School streets.

Districts 4 and 5. Embrace all south of Pleasant street.

The first figure of the box number will indicate the district.

District No. 1.

- 13. Franklin and Rumford.
- 14. State and Penacook.
- 15. Main and Church.
- 16. Franklin and Jackson.
- 17. Alert Hose House.
- 18. Greelev & Todd's store.
- 19. Centre and Auburn.

DISTRICT NO. 2.

- 23. Main and Chapel.
- 24. Main and Centre.
- 25. Main and School.
- 26. Centre and Union.
- 27. School and Merrimack.

DISTRICT No. 3.

- 32. Warren and Pine.
- 34. Central Fire Station.
- 35. Main and Pleasant.
- 36. Pleasant and Spring.
- 37. Junction Pleasant and Washington.

DISTRICT No. 4.

- 41. South and Thompson.
- 42. Good Will Hose House.
- 43. Main and Fayette.
- 45. L. B. Hoit's store.

- 46. Perley and Grove.
- · 47. South, opposite Downing.
 - 48. Thorndike and South.
 - 49. West and Mills.

DISTRICT No. 5.

- 52. Turnpike and Allison.
- 56. S. Paul's School.

Private Boxes.

- 5. Concord and Northern Railroads—north end Passenger Depot
- 6. The Abbot-Downing Company.
- 7. New Hampshire Asylum for the Insane.
- 8. Page Belting Company.
- 33. State-house.

Names of key-holders will be found on the boxes.

FIRE-ALARM SIGNALS.

- 1. Alarms rung in from boxes 41, 42, 43, 45, 46, 47, 48, 49, 52, and 56, will *not* be responded to by the Alert Hose until signalled. The signato proceed to the fire will be a second alarm, except 56.
- 2. Alarms rung in from boxes 13, 14, 15, 16, 17, 18, 23, 26, and 56, will not be responded to by Good Will Hose until signalled. They will be governed by the same signals as the Alert Hose. The Alert Hose and Good Will Hose companies will hitch up and remain in readiness twenty minutes after the first alarm, to all boxes not responded to on first alarm. Then, receiving no signal (all out, or second alarm), the officers in charge shall dismiss their companies.
- 3. Eagle steamer will respond, on first alarm, to boxes No. 5, 6, 7, 8, 23, 24, 25, 33, 34, 35, 42, 43, 45. All other boxes third alarm, except 56.
- 4. Governor Hill steamer will respond, on first alarm, to boxes No. 13, 14, 15, 16, 17, 18, 19, 26, 27, 32, 36, 37, 41, 46, 47, 48, 49, 52. Second alarm, 5, 6, 7, 8, 33, 24, 25, 34, 35. All other boxes on third alarm.
- 5. Two rounds of each eleven strokes of the bells, with an intermission of one minute between the rounds, without any regular box alarm, will signalize the requirement of a steamer from outside the Precinct, and will be responded to by Kearsarge and Eagle Hose companies alone. In case further aid is necessary, the box-alarm 34 (Central Station) will follow.

From the above, it will be seen that the companies are subject to calls as follows:

Steamer Kearsarge and Hose—To all calls.

Eagle Hose—To all calls.

Eagle Steamer-To boxes as designated in paragraph 3.

Governor Hill Steamer—To boxes designated in paragraph 4.

Hook and Ladder—To box alarms only.

.1lert Hose—To box alarms only above Pleasant street, all private boxes, and upon second alarm to boxes below.

Good Will Hose—To box alarms only below Centre street, all private boxes, and upon second alarm to boxes above.

6. All-out signal, three strokes of the bells. This signal will be given by the engineer in charge when the last piece of apparatus has been ordered home, after any alarm.

TESTING SIGNALS.

For the purpose of testing the condition and accuracy of the fire-alarm telegraph, a box alarm will be rung in every Monday afternoon at 4:30 o'clock precisely. It will be one single round only, indicating by the strokes on the bells the number of the box; and the box will then be cut out, and no additional round sounded. The boxes used for this purpose will vary each week, alternating in the circuits.

Upon each other week-day a single blow upon the bell will be struck from the button of a box, alternating as before mentioned.

SCHOOL SIGNALS FOR CLOSING.

Two strokes of the bells given three times, with a pause of fifteen seconds between the rounds.

The signal to close for the forenoon session will be given at 8 o'clock.

The signal to close for the afternoon session will be given at 1:15 o'clock.

The signal to close all schools for one session will be given at 11:30 a.m.

THE FIRE-ALARM TELEGRAPH

Is the "Gamewell" patent. It embraces twenty-four miles of wire on the main lines, and seven miles of extension wire for call-bells.

On the main line are twenty-seven fire-alarm boxes belonging to the city, and five private boxes,—in all, thirty-two. There are three alarm bells,—one of 3,724 pounds (bell-metal), one of 3,740 pounds (bell-metal), and one of 2,000 pounds (American steel). There are also seven engine-house gongs, four mechanical tappers, one four-circuit repeater, and three indicators.

On the extension line are twenty-three call-bells.

The battery consists of 103 cups for the main line, and 5 cups for the extension.

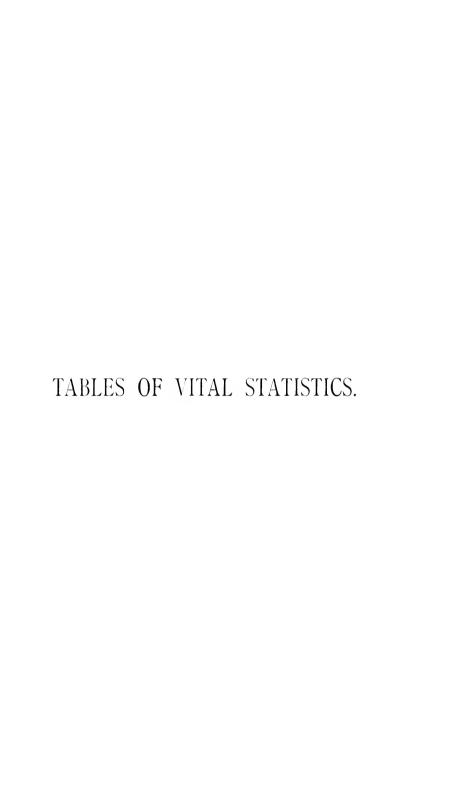

The alarm was put in, in 1880, by Edwin Rogers, 27 Federal street, Boston, Mass.

POLICE COMMISSIONERS.

The legislature of 1893 passed an act creating a board of three Police Commissioners, to be appointed by the governor in the month of March. They are required to make a quarterly report to the board of mayor and aldermen, and a yearly report in the month of December to the governor and council. Governor Smith appointed the following named gentlemen:

				\mathbf{T}	erm expires.	
Charles C. Danforth, I	res	ident,			1899	
Stillman Humphrey,					1897	
Giles Wheeler, Clerk,					1895	

VITAL STATISTICS.

To THE CITY COUNCIL: In compliance with an act of the legislature passed June Session, 1887, requiring "clerks of towns and cities to furnish a transcript of the record of births, marriages, and deaths to the municipal officers for publication in the annual report." I hereby submit the following.
